Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
As part of Phase 3 of our return to campus plan, most units will now run tutorials, seminars and other small group activities on campus, and most will keep an online version available to those students unable to return or those who choose to continue their studies online.

To check the availability of face-to-face activities for your unit, please go to timetable viewer. To check detailed information on unit assessments visit your unit’s iLearn space or consult your unit convenor.
General Information

Unit convenor and teaching staff
Convenor, Lecturer
Gaurav Gupta
gaurav.gupta@mq.edu.au
Contact via Contact via Dialogue Utility on iLearn
To be advised via iLearn

Lecturer, Tutor
Daniel Sutantyo
daniel.sutantyo@mq.edu.au
Contact via Contact via Dialogue Utility on iLearn
To be advised via iLearn

Tutor
Naila Mukhtar
naila.mukhtar@mq.edu.au

Tutor
Thomas Yap
thomas.yap@mq.edu.au

Tutor
Leon Alexander Tantri

Tutor
Nataly Falero

Daniel Sutantyo
daniel.sutantyo@mq.edu.au

Credit points
10

Prerequisites
(COMP1000 or COMP115) or admission to (BActStud or BActStudBSc or BAppFinBActStud or BActStudBProfPrac)

Corequisites

Co-badged status
Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://students.mq.edu.au/important-dates](https://students.mq.edu.au/important-dates)

Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** apply enhanced problem solving skills to develop algorithms

**ULO2:** implement programs from algorithms, showing an understanding of the underlying architecture of the computer

**ULO3:** adhere to standard software engineering practices, including documentation, unit testing and debugging

**ULO4:** compare different methods available for the same problem in terms of efficiency and other criteria

**ULO5:** demonstrate foundational learning skills including active engagement in their learning process

General Assessment Information

Late Submission

For any assessment, no extensions will be granted without an approved application for Special Consideration.

Weekly submissions

Late submissions are NOT accepted for weekly submissions.

Assignments

There will be a deduction of 20% (of the total marks) made from the total awarded mark for each 24 hour period or part thereof that the submission is late. For example,

- an assignment that is late by anywhere between one second and 24 hours will get a 20% penalty. Thus, if your raw mark is 68, it will become 48.

- an assignment that is late by anywhere between 24 hours 1 second and 48 hours will get a 40% penalty. Thus, if your raw mark is 68, it will become 28.
Assessment Tasks

</tbody>
</table>

Quizzes

Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 16 hours
Due: **Weeks 7, 9, 11, 13**
Weighting: **20%**

Online quizzes to assess the understanding of the several topics taught throughout the unit. Students get only one attempt for each quiz.

On successful completion you will be able to:
- apply enhanced problem solving skills to develop algorithms
- implement programs from algorithms, showing an understanding of the underlying architecture of the computer
- adhere to standard software engineering practices, including documentation, unit testing and debugging
- compare different methods available for the same problem in terms of efficiency and other criteria
- demonstrate foundational learning skills including active engagement in their learning process

End-of-semester exam

Assessment Type 1: Examination
Indicative Time on Task 2: 10 hours
Due: **Final Exam Period**

Submissions for assignments will NOT be accepted after the solutions have been posted.
Weighting: **30%**

End of semester exam to assess achievement of learning outcomes from the entire session.

On successful completion you will be able to:
- apply enhanced problem solving skills to develop algorithms
- implement programs from algorithms, showing an understanding of the underlying architecture of the computer
- adhere to standard software engineering practices, including documentation, unit testing and debugging
- compare different methods available for the same problem in terms of efficiency and other criteria
- demonstrate foundational learning skills including active engagement in their learning process

**Weekly submissions**

Assessment Type 1: Practice-based task  
Indicative Time on Task: 20 hours  
Due: **Weeks 3 to 12**  
Weighting: **20%**  
This is a hurdle assessment task (see [assessment policy](https://unitguides.mq.edu.au/unit_offerings/139999/unit_guide/print) for more information on hurdle assessment tasks)

Weekly submissions from the practice package provided. To clear the hurdle, students must submit at least **8 out of 10** submissions that satisfy the minimum requirements, which may be different for each week.

On successful completion you will be able to:
- apply enhanced problem solving skills to develop algorithms
- implement programs from algorithms, showing an understanding of the underlying architecture of the computer
- adhere to standard software engineering practices, including documentation, unit testing and debugging
- compare different methods available for the same problem in terms of efficiency and other criteria
• demonstrate foundational learning skills including active engagement in their learning process

Assignments
Assessment Type 1: Programming Task
Indicative Time on Task 2: 39 hours
Due: Weeks 3, 6, 10, 13
Weighting: 30%

Take-home assignments during the semester to assess problem-solving skills in the domain of the unit topics.

On successful completion you will be able to:
• apply enhanced problem solving skills to develop algorithms
• implement programs from algorithms, showing an understanding of the underlying architecture of the computer
• adhere to standard software engineering practices, including documentation, unit testing and debugging
• compare different methods available for the same problem in terms of efficiency and other criteria
• demonstrate foundational learning skills including active engagement in their learning process

1 If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources
CLASSES
Each week you should attend
• two hours of lectures (delivered online, details to be announced via iLearn),
Unit guide COMP1010 Fundamentals of Computer Science

- two hour practical class

For details of days, times and rooms, consult the timetables webpage.

Note that Lectures and Practical classes commence in week 1.

You should have selected a practical class during enrolment. You should attend the practical class in which you are enrolled. You won't always get the class of your choice. Check availabilities via eStudent regularly. If ALL practical classes are full, only then, contact the convenor.

Please note that you are required to submit work regularly. You will get the help that you need by attending your practical class. Failure to submit work may result in you failing the unit (see the precise requirements in the "Grading Standards" section) or being excluded from the final examination.

TEXTS AND/OR MATERIALS

Lecture notes: https://rebrand.ly/COMP1010LectureNotes

Video tutorials: https://rebrand.ly/COMP1010VideoTutorials

Recommended Textbooks:

   - Online edition of this book is available through MQ Library. There can be up to 5 simultaneous accesses. Click on "Full text available at: 2018 eTextbooks" and login with OneID and password.

TECHNOLOGY USED AND REQUIRED

Audio and Video Lecture

Digital recordings of lectures are available from within iLearn via Active Learning Platform.

Technology

- Java SE - download the latest Java SE to be compatible with the labs.
- Eclipse and Visual Studio Code - the IDEs we shall be using during the session.
- Learning Management System iLearn.
- https://code2flow.com/ for better understanding of control flow.

Discussion Boards
The unit makes use of forums hosted within iLearn. Please post questions there, they are monitored by the unit staff.

## Unit Schedule

Note that three important themes will pervade the entire unit:

1. **Problem-solving.** A crucial skill for all of the weekly topics will be to write appropriate code to meet a given problem specification. This theme relates to the first two learning outcomes for this unit.

2. **Software development.** The use of JUnit testing framework is an important development practice that will be taught from the beginning and used throughout the unit. This theme relates to the third learning outcome of this unit.

3. **Comparing different solution methods.** Very often different algorithms are available for the same problem. Another important skill to develop throughout this unit is the ability to compare different algorithms in terms of efficiency and other criteria. This theme relates to the fourth learning outcome of this unit.

## Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central)
Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy (Note: The Special Consideration Policy is effective from 4 December 2017 and replaces the Disruption to Studies Policy.)

Students seeking more policy resources can visit the Student Policy Gateway (https://students.mq.edu.au/support/study/student-policy-gateway). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

If you would like to see all the policies relevant to Learning and Teaching visit Policy Central (https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policy-central).

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**Learning Skills**

Learning Skills (mq.edu.au/learningskills) provides academic writing resources and study strategies to help you improve your marks and take control of your study.

- Getting help with your assignment
- Workshops
- StudyWise
- Academic Integrity Module
The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

**Student Enquiry Service**

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

**Equity Support**

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

**IT Help**

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

**Changes from Previous Offering**

Due to COVID-restrictions, the assessment structure has significantly changed. Please see the section on Assessments Tasks for further details.

Weekly submissions are the only hurdle assessment.
