Unit description This unit involves the preparation of a research thesis as planned in PSYN8918 Research Proposal, and progressed in PSYN8920 Clinical Neuropsychology Dissertation 1. The research findings are submitted in the form of a 5,000-8,000 word journal article, evaluated by a Macquarie-based examiner and an external examiner.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Conduct an empirical research project which has direct relevance for clinical neuropsychology.

ULO2: Apply data analysis techniques used in neuropsychological research.

ULO3: Submit a draft of the introduction to the empirical paper which is completed in PSYN8921

General Assessment Information

The draft will be reviewed by the supervisor most directly responsible for the project and ultimately considered a credible effort (multiple drafts may be necessary, but usually not). The student then submits the draft to the Unit Convenor, accompanied by an email from the supervisor vouching for its quality. Any extensions are applied for via ask.mq, and there are no late penalties. The unit is graded as Satisfactory only.
