Disclaimer
Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

Notice
As part of Phase 3 of our return to campus plan, most units will now run tutorials, seminars and other small group activities on campus, and most will keep an online version available to those students unable to return or those who choose to continue their studies online.

To check the availability of face-to-face activities for your unit, please go to timetable viewer. To check detailed information on unit assessments visit your unit’s iLearn space or consult your unit convenor.
General Information

Credit points
10

Prerequisites
Admission to MPH or MPH(Res)

Corequisites

Co-badged status
MEDI7101

Unit description
This unit introduces students to the skills of scientific inquiry and appraising evidence which are fundamental to public health research and practice. You will engage in integrated learning about reporting data, study design, data analysis and interpretation, and critical appraisal of research papers in public health. Learning activities will include lectures, tutorials, and online activities. By completing this unit, you will gain knowledge and skills which will enable you to locate, produce and appraise evidence in the field of public health.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

UL01: Identify and explain data commonly used to report on health at a population level
UL02: Calculate and interpret the epidemiologic measures of occurrence and association in order to assess public health impact
UL03: Characterise study designs used in public health and evaluate their strengths and limitations
UL04: Critically appraise public health research papers using an epidemiological framework
General Assessment Information

Information concerning Macquarie University’s assessment policy is available at https://staff.mq.edu.au/work/strategy-planning-and-governance/university-policies-and-procedures/policies/assessment. Grade descriptors and other information concerning grading requirements are contained in Schedule 1 of the Macquarie University Assessment Policy.

To pass this unit, students must demonstrate sufficient evidence of achievement of the learning outcomes and attempt all assessment tasks.

Further details for each assessment task will be available on iLearn, including marking rubrics.

All final grades in the department of Health Systems and Populations are determined by a grading committee and are not the sole responsibility of the Unit Convenor.

Students will be awarded one of these grades plus a Standardised Numerical Grade (SNG). The SNG is not necessarily a summation of the individual assessment components. The final grade and SNG that are awarded reflect the corresponding grade descriptor in Schedule 1 of the Assessment Policy.

Extensions for Assessment tasks

Late Submission of Work

All assignments which are officially received after the due date, and where no extension has been granted by the course convenor or tutor, will incur a deduction of 5% per day penalty including weekends and public holidays. If you submit the assessment task 10 days or more beyond the due date, without an approved extension, you will be awarded a maximum of 50% of the overall assessment marks.

For example:

Introductory concepts
Assessment Type ¹: Quiz/Test
Indicative Time on Task ²: 9 hours
Due: Week 4
Weighting: 10%

Online quiz to examine understanding of introductions epidemiological terms and concepts.

On successful completion you will be able to:

- Identify and explain data commonly used to report on health at a population level
- Calculate and interpret the epidemiologic measures of occurrence and association in order to assess public health impact

Critical appraisal
Assessment Type ¹: Case study/analysis
Indicative Time on Task ²: 24 hours
Due: Week 11
Weighting: 40%

Critical appraisal of an epidemiological paper

On successful completion you will be able to:

- Calculate and interpret the epidemiologic measures of occurrence and association in order to assess public health impact
- Characterise study designs used in public health and evaluate their strengths and limitations
- Critically appraise public health research papers using an epidemiological framework

Final exam
Assessment Type ¹: Examination
Indicative Time on Task: 40 hours
Due: Exam period
Weighting: 50%
Open book exam

On successful completion you will be able to:
• Identify and explain data commonly used to report on health at a population level
• Calculate and interpret the epidemiologic measures of occurrence and association in order to assess public health impact
• Characterise study designs used in public health and evaluate their strengths and limitations
• Critically appraise public health research papers using an epidemiological framework

Portfolio Reflection
Assessment Type: Reflective Writing
Indicative Time on Task: 8 hours
Due: End of session - ongoing
Weighting: 0%

Reflection of student performance and achievement of course learning outcomes

On successful completion you will be able to:
• Identify and explain data commonly used to report on health at a population level
• Calculate and interpret the epidemiologic measures of occurrence and association in order to assess public health impact
• Characterise study designs used in public health and evaluate their strengths and limitations
• Critically appraise public health research papers using an epidemiological framework

1 If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Learning Skills Unit for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources
This unit will be taught in one hour face to face lectures and 2 hour tutorials. These teaching
sessions will be supplemented by readings from the required textbook and additional resources as indicated. Each week you will find the learning objectives and any preparation activities required to be completed prior to your tutorial session on this iLEarn site. This course requires ongoing attention as concepts will build on each other. You are expected to keep up to date with your lecture and tutorial materials.

Unit Organisation

This is a ten credit point unit run over a 13 week session. Further information is available via the online Learning Management System (LMS) iLearn http://ilearn.mq.edu.

Lecture slides and recordings

Lecture slides will be made available for all face to face lectures, as will any ECHO360 recordings of these sessions. ECHO360 recordings can be found on the right-hand side. At times lectures may fail to capture we therefore recommend that you come to all lecture and tutorial sessions.

Readings

The readings for each week will be listed in ilearn using the Leganto system. Leganto is the reading list management system, which you can access through your iLearn unit. More information on Leganto is available here: http://libguides.mq.edu.au/leganto.

Readings marked as 'required' are essential for completion in the marked week. Some readings may be included that are marked as 'recommended' or 'secondary sources', these are additional materials that may be of interest to you. Please use these at your discretion.

Additional Resources

At times we will provide you with additional resources to supplement your learning. These items will vary in nature from readings, website links, articles in the media to perhaps the occasional video. Our aim is to take your learning beyond the basic and help you build your knowledge throughout this degree.

Technology and equipment

Off-campus

To study optimally when off campus you will need to have access to a reliable internet connection to retrieve unit information and at times to join interactive session (eg zoom) or submit assessment tasks via iLearn.

On-campus
Teaching rooms are equipped with state of art audio-visual and ICT equipment including internet connection, high quality video cameras and multiple LCD screens.

Where learning activities (such as tutorials and other small group learning activities) are offered on-campus an online version will be available for those students who choose to continue their studies online (selected via eStudent).

### Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Grade Appeal Policy
- Complaint Management Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit [Student Policies](https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit [Policy Central](https://policies.mq.edu.au) and use the search tool.

### Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/admin/other-resources/student-conduct](https://students.mq.edu.au/admin/other-resources/student-conduct)

### Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

### Student Support

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)
The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Getting help with your assignment
- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Enquiry Service

For all student enquiries, visit Student Connect at ask.mq.edu.au

If you are a Global MBA student contact globalmba.support@mq.edu.au

Equity Support

Students with a disability are encouraged to contact the Disability Service who can provide appropriate help with any issues that arise during their studies.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
