Credit points

10

Prerequisites

120cp at 1000 level or above including ((HLTH108 or ANAT1001) and ((HLTH109 or ANAT1002) or (MEDI203 or MEDI2100)) and (PHTY302 or PHTY3001))

Corequisites

Co-badged status

Unit description

This unit provides you with a broad overview of motor learning, performance, and skill acquisition as it relates to humans. The unit integrates your prior study of anatomy, biomechanics, physiology, neuroscience, behavioural sciences, and psychology as it pertains to human movement. The unit explores the classification of motor skills, the neuromotor processes that underpin motor performance, and features of the learning environment that can be manipulated to promote motor learning in a coaching and/or rehabilitation context. The aim of the unit is to provide a behavioural and physiological understanding of the acquisition and execution of skilled motor actions and how to train and/or retrain motor actions. You will apply your learning through a group project in which you train a healthy person to learn or improve a motor skill. Through this unit you will learn how to instruct and provide feedback as appropriate for a potential future career as a practitioner/clinician.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Define the concepts of motor skill and motor learning and describe the stages of motor skill acquisition

ULO2: Analyse and classify motor skills according to the relevant anatomical, biomechanical, environmental, physiological and psychological requirements

ULO3: Design an evidence-based motor skill training program which is specifically tailored to a healthy person's goals and current ability level

ULO4: Describe strategies to optimise motor learning and performance in healthy people

ULO5: Implement, and progress an evidence-based motor skill training program in healthy people

ULO6: Critically evaluate a motor skill training program

ULO7: Reflect on the development, implementation and evaluation of a motor skill training program and make recommendations to improve future training programs and outcomes.

General Assessment Information

Grade descriptors and other information concerning grading are contained in the Macquarie University Assessment Policy.

All final grades are determined by a grading committee, in accordance with the Macquarie University Assessment Policy, and are not the sole responsibility of the Unit Convenor.

Students will be awarded a final grade and a mark which must correspond to the grade descriptors specified in the Assessment Procedure (clause 128).

To pass this unit, you must demonstrate sufficient evidence of achievement of the learning outcomes, meet any ungraded requirements, achieve a final mark of 50 or better, and make a serious attempt at all assessment items.

Further details for each assessment task will be available on iLearn.

Late Submissions

Unless a Special Consideration request has been submitted and approved, a 5% penalty (OF THE TOTAL POSSIBLE MARK) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For example:

Number of days (hours) late	Total Possible Marks	Deduction	Raw mark	Final mark
1 day (1-24 hours)	100	5	75	70
2 days (24-48 hours)	100	10	75	65
3 days (48-72 hours)	100	15	75	60

7 days (144-168 hours)	100	35	75	40
>7 days (>168 hours)	100	-	75	0

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

Assessment Tasks

Name	Weighting	Hurdle	Due
Motor Skill Analysis	30%	No	Week 5 (Monday 22nd Aug)
Training program and evaluation plan	30%	No	Week 7 (Monday 5th Sep)
Group Presentation	40%	No	Week 13 (tutorial class)

Motor Skill Analysis

Assessment Type 1: Report

Indicative Time on Task 2: 10 hours
Due: Week 5 (Monday 22nd Aug)

Weighting: 30%

Skill analysis of assigned motor task

On successful completion you will be able to:

- Define the concepts of motor skill and motor learning and describe the stages of motor skill acquisition
- Analyse and classify motor skills according to the relevant anatomical, biomechanical, environmental, physiological and psychological requirements
- Reflect on the development, implementation and evaluation of a motor skill training program and make recommendations to improve future training programs and outcomes.

Training program and evaluation plan

Assessment Type 1: Report

Indicative Time on Task 2: 20 hours

Due: Week 7 (Monday 5th Sep)

Weighting: 30%

Training and testing program overview and justification of training and testing

On successful completion you will be able to:

- Design an evidence-based motor skill training program which is specifically tailored to a healthy person's goals and current ability level
- Describe strategies to optimise motor learning and performance in healthy people
- Implement, and progress an evidence-based motor skill training program in healthy people
- · Critically evaluate a motor skill training program
- Reflect on the development, implementation and evaluation of a motor skill training program and make recommendations to improve future training programs and outcomes.

Group Presentation

Assessment Type 1: Presentation Indicative Time on Task 2: 50 hours

Due: Week 13 (tutorial class)

Weighting: 40%

Group presentation focussed on implementation and results of the training program as well as reflection on development, implementation and evaluation of the program.

On successful completion you will be able to:

- Define the concepts of motor skill and motor learning and describe the stages of motor skill acquisition
- Analyse and classify motor skills according to the relevant anatomical, biomechanical, environmental, physiological and psychological requirements
- Design an evidence-based motor skill training program which is specifically tailored to a healthy person's goals and current ability level
- Describe strategies to optimise motor learning and performance in healthy people
- Implement, and progress an evidence-based motor skill training program in healthy people
- · Critically evaluate a motor skill training program

 Reflect on the development, implementation and evaluation of a motor skill training program and make recommendations to improve future training programs and outcomes.

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- · the Writing Centre for academic skills support.

Delivery and Resources

Delivery

As a student enrolled in this unit, you will engage in a range of online and face-to-face learning activities, including online modules and activities, in-person lectures and laboratories, and in-person assessments. Details can be found on the iLearn site for this unit.

Assumed knowledge

This unit builds on your learning in the previous undergraduate units particularly in the area of Anatomy and Biomechanics; In particular, HLTH108/9/ANAT1001/2, BIOL247/BIOL2220, MEDI203/MEDI2100, and PHTY302/PHTY3001.

Teaching and Learning Strategy

This unit will have a weekly lecture and a laboratory roughly every second week n.b., refer to weekly schedule for specific timings. Lectures will provide foundation knowledge and also provide discussion of concepts and ideas to further understanding of the content. Laboratories will allow for the demonstration and learning of practical skills relevant to Human Movement. The teaching approach will be based on students developing a deep understanding of principles and the ability to independently solve problems, with the expectation that students can then translate this knowledge to different scenarios.

Recommended Readings

Essential

This unit does not have any textbooks that are essential for you to purchase.

You will require access to TopHat. Details will be provided in iLearn.

Recommended

The following texts will be useful resources and available in the library. Recommendations about specific readings from these and other resources (such as research papers, books, websites and videos) will be listed on iLearn.

¹ If you need help with your assignment, please contact:

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

- Sports biomechanics: the basics: optimising human performance / Anthony J. Blazevich, 2nd ed., A & C Black Publishers: London
- Fundamentals of Biomechanics / Duane Knudson, 2nd ed., Springer US: Boston, MA
- Biomechanics and motor control of human movement / David A. Winter, 4th ed.,
 Hoboken, N.J.: Wiley, c2009, Wiley-Blackwell Online Books
- Motor learning and control: concepts and applications / Richard A. Magill, New York
 University, David I. Anderson, San Francisco State University. Tenth edition., New York,
 NY: McGraw-Hill
- The biophysical foundations of human movement / Bruce Abernethy ... [et al.]. 2nd ed., Champaign, IL: Human Kinetics

Technology Used

Active participation in the learning activities throughout the unit will require students to have access to a tablet, laptop or similar device. Students who do not own their own laptop computer may borrow one from the university library.

In laboratories, students will use a range of specific equipment typically used in the assessment, management, and development of human physical performance.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit <u>Student Policies</u> (<u>https://students.mq.edu.au/support/study/policies</u>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.e du.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of

Conduct: https://students.mg.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe <u>academic integrity</u> – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free <u>online writing and maths support</u>, academic skills development and wellbeing consultations.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- · Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- · Subject and Research Guides
- Ask a Librarian

Student Services and Support

Macquarie University offers a range of **Student Support Services** including:

- IT Support
- · Accessibility and disability support with study
- Mental health support
- · Safety support to respond to bullying, harassment, sexual harassment and sexual

assault

Social support including information about finances, tenancy and legal issues

Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/ offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the <u>Acceptable Use of IT Resources Policy</u>. The policy applies to all who connect to the MQ network including students.

Inclusion and Diversity

Social inclusion at Macquarie University is about giving everyone who has the potential to benefit from higher education the opportunity to study at university, participate in campus life and flourish in their chosen field. The University has made significant moves to promote an equitable, diverse and exciting campus community for the benefit of staff and students. It is your responsibility to contribute towards the development of an inclusive culture and practice in the areas of learning and teaching, research, and service orientation and delivery. As a member of the Macquarie University community, you must not discriminate against or harass others based on their sex, gender, race, marital status, carers' responsibilities, disability, sexual orientation, age, political conviction or religious belief. All staff and students are expected to display appropriate behaviour that is conducive to a healthy learning environment for everyone.

Professionalism

In the Faculty of Medicine, Health and Human Sciences, professionalism is a key capability embedded in all our courses.

As part of developing professionalism, students are expected to attend all small group interactive sessions including clinical, practical, laboratory, work-integrated learning (e.g., PACE placements), and team-based learning activities. Some learning activities are recorded (e.g., face-to-face lectures), however you are encouraged to avoid relying upon such material as they do not recreate the whole learning experience and technical issues can and do occur. As an adult learner, we respect your decision to choose how you engage with your learning, but we would remind you that the learning opportunities we create for you have been done so to enable your success, and that by not engaging you may impact your ability to successfully complete this unit. We equally expect that you show respect for the academic staff who have worked hard to develop meaningful activities and prioritise your learning by communicating with them in advance if you are unable to attend a small group interactive session.

Another dimension of professionalism is having respect for your peers. It is the right of every student to learn in an environment that is free of disruption and distraction. Please arrive to all learning activities on time, and if you are unavoidably detained, please join activity as quietly as possible to minimise disruption. Phones and other electronic devices that produce noise and

other distractions must be turned off prior to entering class. Where your own device (e.g., laptop) is being used for class-related activities, you are asked to close down all other applications to avoid distraction to you and others. Please treat your fellow students with the utmost respect. If you are uncomfortable participating in any specific activity, please let the relevant academic know.
