**Disclaimer**

Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.
General Information

Unit convenor and teaching staff
Convenor, Lecturer
Sorn Vimonsatit
sorn.vimonsatit@mq.edu.au
Contact via (02) 9850 9145
44 Waterloo Rd, Rm 103
Friday 1pm - 3pm, or other time by pre appointment

Lecturer, Tutor
Hyuk Lee
hyuk.lee@mq.edu.au
Contact via hyuk.lee@mq.edu.au
44 Waterloo Rd
Email for appointment

Lab Demonstration, Tutor
Rajab Abousnina
rajab.abousnina@mq.edu.au
Contact via 02 9850 2171, rajab.abousnina@mq.edu.au
G60, 44 Waterloo Rd
Friday 1pm - 3pm, or other time by pre appointment

Credit points
10

Prerequisites
130cp at 1000 level or above and CIVL2301

Corequisites

Co-badged status
Unit description
In this unit, students will be introduced to concrete structural design including material properties of concrete, section properties, design loads, and design requirements based on Australian Standards. This Unit provides the students with the skills to analyse the capacity of concrete sections in bending, shear, torsion, and the combination of these actions. Students will develop their ability to design reinforced concrete members based on their section capacities to sustain external loadings. They will gain an in-depth understanding of the difference between the actual and design loads, design safety, ultimate strength design and serviceability limit state. Specific topics include properties of concrete materials, concrete reinforcements, actions in concrete members, bending theory and stress block, requirements for bending, shear, and torsion capacities of reinforced concrete beams, columns and slabs, and prestressed concrete.

This unit provides an essential foundation for subsequent structural design project unit and research theses in the fourth year for students who would like to pursue more work in the structural engineering field.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- **ULO1**: convey sound knowledge of the theory, concepts, and principles in concrete structural design
- **ULO2**: comprehend the design of reinforced concrete sections under bending, shear and torsion
- **ULO3**: perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
- **ULO4**: communicate clearly and professionally the design outcomes of reinforced concrete structures
- **ULO5**: demonstrate transferable skills (team player, self-management, time-management, professionalism, and compliance with ethical codes of conducts)

General Assessment Information
The Project report is to be submitted in two parts.

Problem sets are based on the lectures and lab contents.
Assessment Tasks

**Reinforced Concrete Design**

Assessment Type ¹: Project
Indicative Time on Task ²: 21 hours
Due: **Weeks 7 & 13**
Weighting: **30%**

Students will be provided a project brief to design a reinforced concrete structure.

On successful completion you will be able to:

- convey sound knowledge of the theory, concepts, and principles in concrete structural design
- comprehend the design of reinforced concrete sections under bending, shear and torsion
- perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
- communicate clearly and professionally the design outcomes of reinforced concrete structures
- demonstrate transferable skills (team player, self-management, time-management, professionalism, and compliance with ethical codes of conducts)

**Regular problem sets**

Assessment Type ¹: Problem set
Indicative Time on Task ²: 14 hours
Due: **Weeks 3, 6, 9, 12**
Weighting: **20%**

Students will be provided with regular problem sets to complete. Four in total.
On successful completion you will be able to:

- convey sound knowledge of the theory, concepts, and principles in concrete structural design
- comprehend the design of reinforced concrete sections under bending, shear and torsion
- perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
- communicate clearly and professionally the design outcomes of reinforced concrete structures

Final Examination

Assessment Type 1: Examination
Indicative Time on Task 2: 21 hours
Due: Exam week
Weighting: 30%

Final examination assessing the content throughout the semester

On successful completion you will be able to:

- convey sound knowledge of the theory, concepts, and principles in concrete structural design
- comprehend the design of reinforced concrete sections under bending, shear and torsion
- perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
- communicate clearly and professionally the design outcomes of reinforced concrete structures

Mid session test

Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 14 hours
Due: Week 8
Weighting: 20%

Students will be given some problems during the test which will be invigilated.
On successful completion you will be able to:

- comprehend the design of reinforced concrete sections under bending, shear and torsion
- perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
- communicate clearly and professionally the design outcomes of reinforced concrete structures

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

**Delivery and Resources**

Lectures 2 hours per week

SGTA 1 hour per week, starting from Week 1

Practical 2 hours per week, starting from Week 1

Lecture notes will be provided in iLearn.

Note: Practicals are a combination of lab work and workshop for Q&A. Students will participate in the lab work in some weeks; the rest of the weeks will be for tutorials and practice problems.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy
Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Academic Integrity**

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- **Workshops**
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- **Subject and Research Guides**
- **Ask a Librarian**
Student Services and Support

Macquarie University offers a range of **Student Support Services** including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues

Student Enquiries

Got a question? Ask us via **AskMQ**, or contact **Service Connect**.

IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the **Acceptable Use of IT Resources Policy**. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

This is the first time offering this Unit.

Engineers Australia Competency Mapping

<table>
<thead>
<tr>
<th>EA Competency Standard</th>
<th>Unit Learning Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knowledge and Skill Base</td>
<td></td>
</tr>
<tr>
<td>1.1 Comprehensive, theory-based understanding of the underpinning fundamentals applicable to the engineering discipline.</td>
<td>ULO1, ULO2</td>
</tr>
<tr>
<td>1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing.</td>
<td>ULO1, ULO2</td>
</tr>
<tr>
<td>1.3 In-depth understanding of specialist bodies of knowledge</td>
<td>ULO1, ULO2, ULO3</td>
</tr>
<tr>
<td>1.4 Discernment of knowledge development and research directions</td>
<td>ULO1, ULO3</td>
</tr>
<tr>
<td>1.5 Knowledge of engineering design practice</td>
<td>ULO1, ULO3</td>
</tr>
<tr>
<td>1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice.</td>
<td>ULO2, ULO3</td>
</tr>
</tbody>
</table>
Late Submission

Online quizzes, in-class activities, or scheduled tests and exam must be undertaken at the time indicated in the unit guide. Should these activities be missed due to illness or misadventure, students may apply for Special Consideration.

All other assessments must be submitted by 5:00 pm (Sydney Time) on their due date.

Should these assessments be missed due to illness or misadventure, students should apply for Special Consideration.

Assessments not submitted by the due date will receive a mark in accordance with the late submission policy as follows:

A 12-hour grace period will be given after which the following deductions will be applied to the awarded assessment mark: 12 to 24 hours late = 10% deduction; for each day thereafter, an additional 10% per day or part thereof will be applied until five days beyond the due date. After this time, a mark of zero (0) will be given. For example, an assessment worth 20% is due 5 pm on 1 January. Student A submits the assessment at 1 pm, 3 January. The assessment received a mark of 15/20. A 20% deduction is then applied to the mark of 15, resulting in the loss of three (3) marks. Student A is then awarded a final mark of 12/20.

On-campus Activities

SGTA and Practical sessions are on-campus activities, starting from Week 1. Students who are unable to get back to campus in time please contact the Unit Convenor.
