# General Information

## Unit convenor and teaching staff

**Convenor**  
Sam Reisenfeld  
[Contact via E-mail](mailto:sam.reisenfeld@mq.edu.au)  
44 Waterloo Road, Room 135  
Friday, 3-5 pm, online by appointment

**Lecturer**  
Yiqing Lu  
[Contact via E-mail](mailto:yiqing.lu@mq.edu.au)  
7E Wally’s Walk, Room G08  
Monday, 3-5 pm, online by appointment

**Tutor**  
Shahidul Islam  
[Contact via E-mail](mailto:shahidul.islam@mq.edu.au)  
44 Waterloo Road, Room G53  
Tuesday, 3-5 pm online by appointment

## Credit points

10

## Prerequisites

Admission to MEngElecEng

## Corequisites

20cp at 8000 level

## Co-badged status
Unit description
This unit aims to provide students with the theory and hands-on experience in designing and implementing digital signal processing algorithms using software defined radio technology. The unit builds on from preceding Digital Signal Processing unit and introduces the software defined radio concept along with various software defined radio architectures and platforms. Topics covered include: sampling and quantisation, low-pass representation of bandpass systems, quadrature-signal representation, frequency translation, sample rate conversion, decimation and interpolation, direct and polyphase interpolator and decimator architectures, half-band FIR filters, digital up and down converters, matched filters and the software defined radio architectures and platforms. The unit culminates in a project where students develop a software defined radio technology-based solution from high-level functional specifications through to design, implementation and testing on real hardware.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at [https://www.mq.edu.au/study/calendar-of-dates](https://www.mq.edu.au/study/calendar-of-dates)

Learning Outcomes
On successful completion of this unit, you will be able to:

- **ULO1**: Describe what a software defined radio platform is and its constituent functional components.
- **ULO2**: Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- **ULO3**: Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- **ULO4**: Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- **ULO5**: Prepare design documents and reports and communicate and explain design decisions.

General Assessment Information
The entire assessment in this Unit is by Assignment 1 Report, Assignment 1 Oral Defense, Assignment 2 Report, Assignment 2 Oral Defense, Project Report, and an Oral Examination on the outcome of the Project. Passing this Unit requires an overall Mark of 50 out of 100. There is no Final Examination, and therefore there is no Supplemental Examination. There are no hurdle requirements.

If assessments are missed due to illness or misadventure, students should apply for Special Consideration. Oral Defenses must be taken at the time indicated in the Unit Guide.
these activities be missed due to illness or misadventure, students may apply for Special Consideration.

All report assessments must be submitted by 5:00 pm (Sydney Time) on their due date. Resubmissions will not be allowed.

Should these assessments be missed due to illness or misadventure, students should apply for Special Consideration.

Assessments not submitted by the due date will receive a mark in accordance with the late submission policy as follows:

A 12-hour grace period will be given after which the following deductions will be applied to the awarded assessment mark: 12 to 24 hours late = 10% deduction; for each day thereafter, an additional 10% per day or part thereof will be applied until five days beyond the due date. After this time, a mark of zero (0) will be given. For example, an assessment worth 20% is due 5 pm on 1 January. Student A submits the assessment at 1 pm, 3 January. The assessment received a mark of 15/20. A 20% deduction is then applied to the mark of 15, resulting in the loss of three (3) marks. Student A is then awarded a final mark of 12/20.

**Assignment 1**

Assessment Type: Report
Indicative Time on Task: 20 hours
Due: **Week 4**
Weighting: **10%**

Assignment 1 Report (1000 word equivalent)

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional
components.

- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.

**Defence 1**

**Assessment Type**: Viva/oral examination

**Indicative Time on Task**: 5 hours

**Due**: Week 5

**Weighting**: 15%

An oral examination on the first part of the unit

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.

**Assignment 2**

**Assessment Type**: Report

**Indicative Time on Task**: 20 hours

**Due**: Week 10

**Weighting**: 10%

Assignment 2 Report (1000 word equivalent)

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
• Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
• Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
• Prepare design documents and reports and communicate and explain design decisions.

Defence 2
Assessment Type 1: Viva/oral examination
Indicative Time on Task 2: 5 hours
Due: Week 11
Weighting: 20%

An oral examination on the second part of the unit.

On successful completion you will be able to:
• Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
• Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
• Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
• Prepare design documents and reports and communicate and explain design decisions.

Project Report
Assessment Type 1: Report
Indicative Time on Task 2: 25 hours
Due: Week 12
Weighting: 15%

Project Report (2000-word equivalent)

On successful completion you will be able to:
• Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-
radio-specific digital signal processing algorithms and their efficient implementations.

- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.

Project Defence and Demonstration

Assessment Type 1: Viva/oral examination
Indicative Time on Task 2: 10 hours
Due: Week 13
Weighting: 30%

An oral examination of the outcomes of the project

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.

---

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

The Unit will be delivered with a two-hour lecture, a one-hour SGTA, and a three-hour laboratory for each week. The unit requires some project work with RTL-SDR devices manufactured by Nooelec. Students are required to purchase their own devices, which are USB plug-in units for either laptop or desktop computers. The software required is MATLAB or Simulink, which may
be downloaded by Macquarie University students from the Mathworks Website. For on-campus laboratory work, RTL-SDR devices will be available for use by students.

Lectures will be delivered online. SGTAs and Practical Classes will be delivered on-campus.

There will be a return to on-campus activities for Semester 1, 2022. If students are unable to get back to campus in time for the start of semester, the students should contact the Unit Convenor as soon as possible.

SGTA and Practical Classes start in Week 1.

**Unit Schedule**

Lectures will be delivered online. SGTAs and Practical Classes will be delivered on-campus.

If students have difficulty in attending on-campus SGTAs or Practical Classes because they cannot get back to campus on time, they should contact the Unit Convenor as soon as possible.

SGTA and Practical Classes start in Week 1.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central ([https://policies.mq.edu.au](https://policies.mq.edu.au)). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies ([https://students.mq.edu.au/support/study/policies](https://students.mq.edu.au/support/study/policies)). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central ([https://policies.mq.edu.au](https://policies.mq.edu.au)) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/admin/other-resources/student-conduct](https://students.mq.edu.au/admin/other-resources/student-conduct)

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the
University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity
At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre
The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support
Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues

Student Enquiries
Got a question? Ask us via AskMQ, or contact Service Connect.
IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering
There are no changes from the previous offering.
