Unit description

This unit aims to: provide an understanding of the anatomy and physiology of speech production mechanisms; discuss the acoustic categorisation of speech, and its acoustic and linguistic structure; demonstrate how speech sounds are measured and analysed; and discuss the effect of speech perception and production in hearing and language disordered populations.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:
