Unit description

The aim of this unit is to provide students with entrepreneurial skills that are needed to build scalable startups in addition to entrepreneurial behaviours that are required to work in organisations within an engineering context. It will provide students with fundamental knowledge and procedures of creating successful ventures. The course will include the process of understanding customer requirements and converting these into specifications of a product and then designing a process to produce these. The course will also include other aspects that support entrepreneurship such as business planning, financial management, sources of finance, crowdfunding, entrepreneurial behaviour and technology management.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>
