Unit description

This unit introduces concepts of investment analysis and their practical application. With an international approach, the unit covers fundamentals in asset classes and financial trading, portfolio theory and practices, equilibrium in capital markets including modern asset pricing models and behavioural finance, fixed-income securities, and security analysis and selection.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Explore common investment vehicles.

ULO2: Illustrate the theory and empirical applications of modern portfolio theory and asset pricing models.

ULO3: Construct optimal portfolios applying the principles of modern portfolio theory.

ULO4: Analyze macroeconomic and industry situations as well as behavioural biases that impact on investment decisions.

General Assessment Information

Late submissions of assessments

Unless a Special Consideration request has been submitted and approved, no extensions will be granted. There will be a deduction of 10% of the total available assessment-task marks made from the total awarded mark for each 24-hour period or part thereof that the submission is late. Late submissions will only be accepted up to 96 hours after the due date and time.

No late submissions will be accepted for timed assessments – e.g., quizzes, online tests.

Table 1: Penalty calculation based on submission time

Submission time after the due date (including weekends)	Penalty (% of available assessment task mark)	Example: for a non-timed assessment task marked out of 30
< 24 hours	10%	10% x 30 marks = 3-mark deduction
24-48 hours	20%	20% x 30 marks = 6-mark deduction
48-72 hours	30%	30% x 30 marks = 9-mark deduction
72-96 hours	40%	40% x 30 marks = 12-mark deduction
> 96 hours	100%	Assignment won't be accepted

Other assessment criteria for assessment tasks will be provided on the unit iLearn site.

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](#) for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Classes will typically consist of a two-hour lecture plus a one-hour tutorial. Lectures are used to set the scene and show how the topic fits into the overall unit of study aims. You will be expected to have read the required reading before that week's class.

Tutorials are essential for helping address any misunderstandings and to apply concepts to more difficult problems. Participation is strongly encouraged so students can check their understanding of concepts. Students should be prepared to present their homework solutions in the tutorials and/or to discuss the related conceptual issues.

Attendance at lectures and tutorials is a compulsory component of the Unit, and students are expected to attend all classes. If a student misses more than two classes then they could be given a written warning that non-attendance can lead to a Fail grade in the Unit.

Other Course Materials:

Homework will be assigned at the end of lectures and these should be completed before coming to the following week's tutorial where students get to discuss their homework solutions.
