Unit description

In order to compete effectively in increasingly dynamic markets, firms must be cognisant of the importance of marketing and how it contributes to the achievement of strategic goals. This cognition is enhanced when they can effectively apply marketing theories to identify marketing opportunities and solve marketing problems. Marketing theories explain how and why value is created and offered to consumers and captured by the firm. Through appropriate identification and utilization of marketing theory, firms can deal with challenges from consumers as well as markets that may simply go beyond the traditional boundaries that are thought to operate. In this unit, students will develop knowledge of differing perspectives and schools of thought about marketing theory, and contemporary debates on marketing theory and practice. Students will learn to critically analyse marketing theories and identify differences and similarities in marketing theories. Students will apply different marketing theories in specific contexts to identify marketing opportunities and solve marketing problems considering social and environmental issues.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Explain and evaluate diverse marketing theories.

ULO2: Critically analyse marketing theories and identify differences and similarities.

ULO3: Apply different marketing theories in specific contexts to identify marketing opportunities and solve marketing problems considering social and environmental issues.

General Assessment Information

Late submissions of assessments Unless a Special Consideration request has been submitted and approved, no extensions will be granted. There will be a deduction of 10% of the total available assessment-task marks made from the total awarded mark for each 24-hour period or part thereof that the submission is late. Late submissions will only be accepted up to 96 hours after the due date and time.

No late submissions will be accepted for timed assessments – e.g., quizzes, online tests.

Table 1: Penalty calculation based on submission time

Submission time after the due date (including weekends)	Penalty (% of available assessment task mark)	Example: for a non-timed assessment task marked out of 30
< 24 hours	10%	10% x 30 marks = 3-mark deduction
24-48 hours	20%	20% x 30 marks = 6-mark deduction
48-72 hours	30%	30% x 30 marks = 9-mark deduction
72-96 hours	40%	40% x 30 marks = 12-mark deduction
> 96 hours	100%	Assignment won't be accepted

Special Consideration To request an extension on the due date/time for a timed or non-timed assessment task, you must submit a Special Consideration application. An application for Special Consideration does not guarantee approval.

The approved extension date for a student becomes the new due date for that student. The late submission penalties above then apply as of the new due date.
