Unit description

Public Health is intrinsically related to social justice and alleviating the outcomes associated with negative health determinants, including marginalisation. In line with this philosophy, you will explore the nature of marginalisation and its impacts on the health of individuals and populations. We will investigate the role of policy in improving health and in some cases, creating further disadvantage in at risk populations. We will also investigate the unique nature of undertaking research with marginalised populations, particularly the necessity to involve relevant stakeholders in all stages of the research endeavour and service delivery so as to promote social justice and equity for marginalised populations and create inclusive health systems that meet diverse needs.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Describe the key characteristics and individual and social determinants of marginalisation in a population health context

ULO2: Evaluate interventions designed to improve health outcomes in marginalised populations

ULO3: Develop culturally aware techniques for engagement with and advocacy for marginalised populations in public health practice and/or research to create inclusive

systems

ULO4: Critically appraise health policy related to marginalised populations with particular consideration of pragmatic approaches to development and delivery of policy
