### Unit description

In this unit, students gain an understanding of how infectious diseases, from tuberculosis to COVID-19, have significantly impacted on human populations. You will focus on infectious disease epidemiology to learn about how diseases spread both locally and globally. You will explore the concepts of source of infection and immunity, surveillance as a tool for understanding burden of disease and impact of control strategies, and outbreak investigations to identify sources and management of disease spread. You will explore these themes through case studies such as sexually transmissible diseases, HIV/AIDS and vaccine preventable diseases. You will explore current out-break investigations and infectious disease surveillance methods; and will learn how key aspects of, and innovations in, infectious disease management have impacted on public health law, management and policy.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://www.mq.edu.au/study/calendar-of-dates](https://www.mq.edu.au/study/calendar-of-dates)

## Learning Outcomes

On successful completion of this unit, you will be able to:

- **ULO1**: Describe the principles of infectious disease epidemiology
- **ULO2**: Critically review and evaluate surveillance systems for infectious diseases
- **ULO3**: Apply the principles of outbreak investigation in the context of containing infectious diseases
- **ULO4**: Judge how control of infectious diseases has impacted on public health law and policy
General Assessment Information

Grade descriptors and other information concerning grading are contained in the Macquarie University Assessment Policy.

All final grades are determined by a grading committee, in accordance with the Macquarie University Assessment Policy, and are not the sole responsibility of the Unit Convenor.

Students will be awarded a final grade and a mark which must correspond to the grade descriptors specified in the Assessment Procedure (clause 128).

To pass this unit, you must demonstrate sufficient evidence of achievement of the learning outcomes, meet any ungraded requirements, and achieve a final mark of 50 or better.

Further details for each assessment task will be available on iLearn.

Late Submissions

Unless a Special Consideration request has been submitted and approved, a 5% penalty (OF THE TOTAL POSSIBLE MARK) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For example:

<table>
<thead>
<tr>
<th>Number of days (hours) late</th>
<th>Total Possible Marks</th>
<th>Deduction</th>
<th>Raw mark</th>
<th>Final mark</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 day (1-24 hours)</td>
<td>100</td>
<td>5</td>
<td>75</td>
<td>70</td>
</tr>
<tr>
<td>2 days (24-48 hours)</td>
<td>100</td>
<td>10</td>
<td>75</td>
<td>65</td>
</tr>
<tr>
<td>3 days (48-72 hours)</td>
<td>100</td>
<td>15</td>
<td>75</td>
<td>60</td>
</tr>
<tr>
<td>7 days (144-168 hours)</td>
<td>100</td>
<td>35</td>

### Unit guide HSYP8005 Infectious Disease Epidemiology

#### Activity assessment

**Assessment Type** 1: Quiz/Test  
**Indicative Time on Task** 2: 15 hours  
**Due:** All to be completed by Week 13  
**Weighting:** 20%

A series of activities (MCQ, short answer, problem solving, engagement) designed to foster engagement with weekly learning materials

On successful completion you will be able to:
- Describe the principles of infectious disease epidemiology
- Critically review and evaluate surveillance systems for infectious diseases
- Apply the principles of outbreak investigation in the context of containing infectious diseases
- Judge how control of infectious diseases has impacted on public health law and policy

#### Interpretation of surveillance data

**Assessment Type** 1: Case study/analysis  
**Indicative Time on Task** 2: 35 hours  
**Due:** Week 8  
**Weighting:** 35%

Case study interpreting real world surveillance data

On successful completion you will be able to:
- Describe the principles of infectious disease epidemiology
- Critically review and evaluate surveillance systems for infectious diseases
- Apply the principles of outbreak investigation in the context of containing infectious diseases
Cases studies in infectious disease monitoring and control

Assessment Type 1: Case study/analysis
Indicative Time on Task 2: 40 hours
Due: Week 13
Weighting: 45%

A combination of tasks focused on appraisal and analysis of control of specific infectious diseases

On successful completion you will be able to:
• Describe the principles of infectious disease epidemiology
• Critically review and evaluate surveillance systems for infectious diseases
• Apply the principles of outbreak investigation in the context of containing infectious diseases
• Judge how control of infectious diseases has impacted on public health law and policy

Unit reflection

Assessment Type 1: Reflective Writing
Indicative Time on Task 2: 1 hours
Due: Week 14
Weighting: 0%

Reflection on experience in the unit with consideration of expectations on entry and outcomes at completion of the unit. This reflection may contribute to course based assessment in the Capstone Unit.

On successful completion you will be able to:
• Describe the principles of infectious disease epidemiology
• Critically review and evaluate surveillance systems for infectious diseases
• Apply the principles of outbreak investigation in the context of containing infectious diseases
• Judge how control of infectious diseases has impacted on public health law and policy

1 If you need help with your assignment, please contact:

https://unitguides.mq.edu.au/unit_offerings/151467/unit_guide/print
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

As a student enrolled in this unit, you will engage in a range of learning activities, including readings, online modules, videos and lectures etc. As an 'In-person' student there are designated dates where you will be expected to attend class on campus. Details can be found on the iLearn site for this unit.

Recommended readings are provided in Leganto

Technology Used

Active participation in the learning activities throughout the unit will require students to have access to a tablet, laptop or similar device. Students who do not own their own laptop computer may borrow one from the university library.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

• Academic Appeals Policy
• Academic Integrity Policy
• Academic Progression Policy
• Assessment Policy
• Fitness to Practice Procedure
• Assessment Procedure
• Complaints Resolution Procedure for Students and Members of the Public
• Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of
Student Support

Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual
Social inclusion at Macquarie University is about giving everyone who has the potential to benefit from higher education the opportunity to study at university, participate in campus life and flourish in their chosen field. The University has made significant moves to promote an equitable, diverse and exciting campus community for the benefit of staff and students. It is your responsibility to contribute towards the development of an inclusive culture and practice in the areas of learning and teaching, research, and service orientation and delivery. As a member of the Macquarie University community, you must not discriminate against or harass others based on their sex, gender, race, marital status, carers' responsibilities, disability, sexual orientation, age, political conviction or religious belief. All staff and students are expected to display appropriate behaviour that is conducive to a healthy learning environment for everyone.

PROFESSIONALISM

In the Faculty of Medicine, Health and Human Sciences, professionalism is a key capability embedded in all our courses.

As part of developing professionalism, students are expected to attend all small group interactive sessions including clinical, practical, laboratory, work-integrated learning (e.g., PACE placements), and team-based learning activities. Some learning activities are recorded (e.g., face-to-face lectures), however you are encouraged to avoid relying upon such material as they do not recreate the whole learning experience and technical issues can and do occur. As an adult learner, we respect your decision to choose how you engage with your learning, but we would remind you that the learning opportunities we create for you have been done so to enable your success, and that by not engaging you may impact your ability to successfully complete this unit. We equally expect that you show respect for the academic staff who have worked hard to develop meaningful activities and prioritise your learning by communicating with them in advance if you are unable to attend a small group interactive session.

Another dimension of professionalism is having respect for your peers. It is the right of every student to learn in an environment that is free of disruption and distraction. Please arrive to all learning activities on time, and if you are unavoidably detained, please join activity as quietly as possible to minimise disruption. Phones and other electronic devices that produce noise and
other distractions must be turned off prior to entering class. Where your own device (e.g., laptop) is being used for class-related activities, you are asked to close down all other applications to avoid distraction to you and others. Please treat your fellow students with the utmost respect. If you are uncomfortable participating in any specific activity, please let the relevant academic know.
