Unit description

Around the world and across time, human cultural variation has extended into the depths of the human psyche, shaping different ways of being human. Are we all the same or do the ways we treat emotion, conflict, social interaction, cognition, and other dimensions of life result in differences among people? Psychological anthropology has traditionally focused on such themes, investigating the cultural dimensions of self, personality, cognition, emotion, normalcy and deviance, seeking to understand both the variant and universal features of human emotional, cognitive, and social life. Students will have the opportunity to explore an area of personal interest in psychological anthropology.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Demonstrate mastery of psychological anthropology, analysing and discussing the literature and central theories related to psychological anthropology and the broader study of cultural practices in their social and cultural contexts.

ULO2: Discover the variety of humanity, including the peculiarity of Western traits, ways we understand ourselves, and social roles.

ULO3: Interrogate 'human nature' to better understand the relationship between universal traits and variability.

ULO4: Explore the role of social setting and norms in shaping human development.

ULO5: Actively participate in collegial discussion of anthropological theory.

ULO6: Gain greater understanding of techniques for investigating experience, including ethnography, field research, and comparative approaches.

ULO7: Improve writing and critical reading skills.
