Unit description

We live an increasing part of our lives online, playing videogames, and engaging with various technologies and virtual realities. Our workplaces are more automated, cars drive themselves, and robots take care of us. Is this a good thing? What is it doing to us? Where will it take us in the future? In this unit we draw on philosophical and ethical theories to explore the impacts of information and related technologies on humanity. Topics we will explore include issues around human-technology relations, such as: technological neutrality and technological determinism; embodiment, gender, and technology; and the co-evolution of mind and technology. We will examine ethical aspects of technology, such as: the impacts that online sharing has on our philosophical understandings of friendship; the right to internet privacy; how theories in moral psychology explain the ethical impacts of playing videogames; the ethics of self-driving cars and robotic care-workers; and the justice implications of the automatisisation of work. Finally, we also look at topics surrounding the intertwining of humanity and technology and the future impacts of Artificial Intelligence (AI), such as: whether AI and the singularity is an existential risk to humanity; how technology will be used as a tool of human enhancement; and whether we will (and should) become cyborgs and stop being human.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: explain the major theories about the philosophical and ethical issues raised by new forms of technology.

ULO2: analyse arguments in the relevant literatures.

ULO3: evaluate relevant theories and arguments critically.

ULO4: communicate clearly your own perspective on the views and arguments presented in the unit.

General Assessment Information

Unless a Special Consideration request has been submitted and approved, (a) a penalty for lateness will apply – 10 marks out of 100 credit will be deducted per day for assignments submitted after the due date – and (b) no assignment will be accepted more than seven days (incl. weekends) after the original submission deadline.
