Unit description

Disasters and extreme events, such as storms, floods, disease or bushfires, cause significant social, economic and environmental upheaval that directly affects people and places around the world. Resilience refers to the capacity of communities to anticipate, prepare and adapt to the risk of disaster and respond and recover when events occur. In the context of rapid climate change and ecological degradation, it is becoming increasingly urgent that communities plan for disaster and develop resilience strategies. This unit examines the social and biophysical origins of contemporary disasters, how disasters unfold at a range of sites and scales, how they are shaped by diverse geographies and vulnerabilities, the limits of community resilience, and how resilience can be improved. Contemporary cases from Australia and the Asia-Pacific region will be used to highlight key issues and policy debates. Overall, the unit will provide an understanding in both theory and practice about the ways in which communities respond to disaster and allow students to develop the skills and knowledge needed to pursue more resilient futures.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Identify and discuss the causes and consequences of contemporary disasters

ULO2: Engage with and critique the concepts of vulnerability and resilience in theory and practice

ULO3: Evaluate projects and policies that seek to create more resilient futures

ULO4: Synthesise data from the social and environmental sciences to assess disaster risks and develop strategies to improve local community resilience

ULO5: Communicate to diverse audiences using appropriately selected written, oral and visual means

General Assessment Information

Late Assessment Submission Penalty

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of '0' (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue.

*This late penalty will apply to non-timed sensitive assessment (incl essays, reports, posters, portfolios, journals, recordings etc). **Late submission of time sensitive tasks** (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs etc) **will only be addressed by the unit convenor in a Special consideration application. Special Consideration outcome may result in a new question or topic.***

To successfully pass GEOP3020 students must complete all assessment tasks. Failure to complete any single assessment task may result in failure of the unit. The final grade is based on the total mark accumulated from all assessment tasks.

Students must keep a clean electronic copy of all assignments (preferably as a PDF) submitted for assessment.
