Unit description

Our economy is changing. New technology, social norms and politics are reshaping who does what, and who gets what. In this unit we look at what has changed, and what will change. Why is work becoming less secure, housing more expensive and inequality growing? How are the choices of national governments shaped by broader global forces? We examine the big trends driving change, for example, the rise of service employment and automation, the introduction of competition in public services and distrust in formal politics. Not only will we explore what is driving inequality and insecurity, we also ask how we can respond - as (future) workers, governments and citizens.
