Unit description

The unit begins with an examination of the historical and theoretical framework of commercial law. The competing claims of predictability and certainty with principles such as good faith, fairness and reasonableness are analysed. A critical approach to the existing law of contract concentrating on methods of interpretation in the commercial context completes this part of the unit. Students then undertake a detailed study of the law of common commercial relationships and transactions such as principal and agent, commercial sale of goods, negotiable instruments, insurance and bankruptcy.
