Unit description

This unit studies the long-term developments of ancient Egyptian society and culture from the Predynastic to Late Antique periods (ca. 5000 BCE to 1000 CE). Informed by theory and research paradigms developed in the social and cultural sciences, the unit will identify the processes by which the ancient Egyptian culture was transformed and yet maintained its cultural identity throughout its long history. Topics to be examined include, social organisation, identity and personhood, modes of governance, the social dimensions of ancient Egyptian mortuary practices, the complexity and variability of visual culture and representation, in addition to the use and adaptive re-use of mortuary and cultic landscapes and the reception of ancient Egypt in the memory of the world.

Delivery and Resources

UNIT REQUIREMENTS AND EXPECTATIONS

This unit will be structured following a [Flipped classroom](#) model, which describes a reversal of traditional teaching where students gain first exposure to new material outside of class, usually via reading or lecture videos, and then class time is used to do the harder work of assimilating that knowledge through strategies such as problem-solving, discussion or debates. The unit will be taught via a blended delivery of content and instruction using a multi-media approach such as video lectures, 3D digital artefacts and visualisations. The learning materials will be a combination of pre-recorded lectures produced by Macquarie University academic staff as well as links to a variety of new media, such as audio recordings/podcasts, blogs, think pieces, and/or social media posts created by local and international scholars. Through such approaches you will develop transferrable skills and analytical capacities that can be applied across various professional and academic settings.

WEEKLY SCHEDULE

iLearn will play a pivotal role throughout the session and will be your central hub for information and instructions. Each week will be structured as follows:
