**Unit description**

With the increased diversity of contexts for English language learning, language teachers need to develop competencies in evaluating and implementing appropriate language classroom practices for different contexts. This unit is a practical application of the content of APPL6000 and APPL6010. Learners complete classroom observation tasks of videorecorded lessons; evaluate a series of videorecorded lessons based upon principles of TESOL methodology, including planning and programming principles; and systematically compare and contrast different approaches to second language teaching and learning - all this across a variety of language teaching and learning contexts. The unit is aimed at students looking for a practical application of TESOL methodology without undertaking a Practicum. It is not intended as a replacement for the practical experience gained on a practicum such as APPL8220.
