Unit description
Imagine working on a complex problem with your team that you have been unable to solve. In situations such as these, organisations often turn to external support, in the form of management consultants, to help address highly complex problems. Effective management consultants are specialists who are well-versed in complex problem solving with the ability to devise viable strategies to improve an organisation's performance. This unit provides you with an introduction to a range of established and emerging management consultancy practices such as design thinking, customer journey mapping, and agile methodology. Although you may not want to pursue a career as a management consultant yourself, this unit will teach you what tools and frameworks they draw upon in solving complex problems for their clients. You will be provided with a 'problem solving toolbox' containing best practice and next practice frameworks, techniques and methodologies. Our industry partners share their insights and experience with problem solving so that you get the 'best-of' overview that can be applied immediately to your own workplace.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:
ULO1: Examine the many (evolving) roles that management consultants take inside and outside of enterprises

ULO2: Synthesise complex ideas and data to identify problems.

ULO3: Apply cognitive and creative skills to determine appropriate approaches to solving problems.

ULO4: Design approaches to ascertain the root causes of problems, rise to managerial challenges, act analytically and tenaciously both personally and cooperatively in a systematic and measured manner

**General Assessment Information**

**Late Assessment Submission Penalty (written assessments)**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55 pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.
