Unit description

This unit provides a study of algorithms, data structures and programming techniques. The topics covered include: trees; graphs and heaps; advanced sorting techniques; elements of storage management; and complexity. The presentation emphasises the role of data abstraction and correctness proofs.

This unit provides a foundation-level study of programming. The topics covered include programming environment and the process of program execution, variables, operators, boolean logic, control structures including conditions and loops, functions, storage of collection of items and performing operations on the same, and file management.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Apply enhanced problem solving skills to develop algorithms

ULO2: Implement programs from algorithms, showing an understanding of control flow.

ULO3: Adhere to standard software development skills such as test-driven development and debugging

ULO4: Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

General Assessment Information

Late Assessment Submission Penalty

From 1 July 2022, Students enrolled in Session-based units with written assessments will have the following late penalty applied. Please see <https://students.mq.edu.au/study/assessment-exams/assessments> for more information.

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at **11:55 pm**. A 1-hour grace period is provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for [Special Consideration](#).

Assessments where Late Submissions will be accepted

In this unit, late submissions will be accepted as follows:

- Weekly Submissions: NO, unless Special Consideration is granted
- Assignments: YES, Standard Late Penalty applies

Assessment Tasks

Name	Weighting	Hurdle	Due
Weekly submissions	0%	No	Weekly
Online Quiz 1	10%	No	Week 4 Practical Class
Online quiz 2	10%	No	Week 7 Practical Class
Online quiz 3	10%	No	Week 9 Practical Class
Online quiz 4	10%	No	Week 12 Practical Class
Assignment 1	5%	No	11:55pm, Sunday ending week 4

Name	Weighting	Hurdle	Due
Assignment 2	15%	No	11:55pm, Sunday ending second week of teaching break
Assignment 3	10%	No	11:55pm, Sunday ending week 10
Assignment 4	10%	No	11:55pm, Sunday ending week 13
zoom viva	20%	No	Final exam period

Weekly submissions

Assessment Type ¹: Programming Task

Indicative Time on Task ²: 15 hours

Due: **Weekly**

Weighting: **0%**

Each week, students are required to submit a piece of code containing solutions to a given set of problems

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Online Quiz 1

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 5 hours

Due: **Week 4 Practical Class**

Weighting: **10%**

An online quiz that requires students to complete a number of questions via iLearn within a given time window.

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Online quiz 2

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 5 hours

Due: **Week 7 Practical Class**

Weighting: **10%**

An online quiz that requires students to complete a number of questions via iLearn within a given time window.

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Online quiz 3

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 5 hours

Due: **Week 9 Practical Class**

Weighting: **10%**

An online quiz that requires students to complete a number of questions via iLearn within a given time window.

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Online quiz 4

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 5 hours

Due: **Week 12 Practical Class**

Weighting: **10%**

An online quiz that requires students to complete a number of questions via iLearn within a given time window.

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Assignment 1

Assessment Type ¹: Programming Task

Indicative Time on Task ²: 5 hours

Due: **11:55pm, Sunday ending week 4**

Weighting: **5%**

Programming assignment that requires students to solve a real-life problem based on the contents covered in the first half of the semester

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Assignment 2

Assessment Type ¹: Programming Task

Indicative Time on Task ²: 15 hours

Due: **11:55pm, Sunday ending second week of teaching break**

Weighting: **15%**

Programming assignment that requires students to solve a real-life problem based on the contents covered during the semester

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Assignment 3

Assessment Type ¹: Programming Task

Indicative Time on Task ²: 10 hours

Due: **11:55pm, Sunday ending week 10**

Weighting: **10%**

Programming assignment that requires students to solve a real-life problem based on the contents covered during the semester

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms

- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

Assignment 4

Assessment Type ¹: Programming Task

Indicative Time on Task ²: 10 hours

Due: **11:55pm, Sunday ending week 13**

Weighting: **10%**

Programming assignment that requires students to solve a real-life problem based on the contents covered during the semester

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.
- Adhere to standard software development skills such as test-driven development and debugging
- Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections

zoom viva

Assessment Type ¹: Viva/oral examination

Indicative Time on Task ²: 12 hours

Due: **Final exam period**

Weighting: **20%**

Students need to answer a number of programming questions, and complete a few programming tasks within a given time window.

On successful completion you will be able to:

- Apply enhanced problem solving skills to develop algorithms
- Implement programs from algorithms, showing an understanding of control flow.

- Adhere to standard software development skills such as test-driven development and debugging
 - Understand and apply important foundation-level programming concepts such as variables, operators, boolean logic, control structures, functions and collections
-

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](#) for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Lecture notes: <https://softwaretechnologymq.github.io/>

Python (3.10.2 at the time of writing this guide): <https://python.org/>

Visual Studio Code: <https://code.visualstudio.com/>

Unit Schedule

- week 1 - software, installation, the first program
- week 2 - variables and operators
- week 3 - conditions
- week 4 - loops
- week 5 - problem-solving/case study using topics from weeks 1 to 4
- week 6 - functions (1)
- week 7 - problem-solving/case study using topics from weeks 1 to 7

2 WEEK TEACHING BREAK

- week 8 - collections (1)
- week 9 - collections (2)
- week 10 - functions (2) (with collections)
- week 11 - file system, i/o (raw csv i/o)
- week 12 - problem-solving/case study using topics from weeks 1 to 11
- week 13 - no lecture or practical

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](#) (<https://policie>

[s.mq.edu.au](https://www.mq.edu.au)). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Assessment Procedure](#)
- [Complaints Resolution Procedure for Students and Members of the Public](#)
- [Special Consideration Policy](#)

Students seeking more policy resources can visit [Student Policies \(https://students.mq.edu.au/support/study/policies\)](https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit [Policy Central \(https://policies.mq.edu.au\)](https://policies.mq.edu.au) and use the [search tool](#).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/admin/other-resources/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe [academic integrity](#) – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free [online writing and maths support](#), [academic skills development](#) and [wellbeing consultations](#).

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

The Writing Centre

[The Writing Centre](#) provides resources to develop your English language proficiency, academic writing, and communication skills.

- [Workshops](#)
- [Chat with a WriteWISE peer writing leader](#)
- [Access StudyWISE](#)
- [Upload an assignment to Studiosity](#)
- [Complete the Academic Integrity Module](#)

The Library provides online and face to face support to help you find and use relevant information resources.

- [Subject and Research Guides](#)
- [Ask a Librarian](#)

Student Services and Support

Macquarie University offers a range of [Student Support Services](#) including:

- [IT Support](#)
- [Accessibility and disability support](#) with study
- Mental health [support](#)
- [Safety support](#) to respond to bullying, harassment, sexual harassment and sexual assault
- [Social support including information about finances, tenancy and legal issues](#)

Student Enquiries

Got a question? Ask us via [AskMQ](#), or contact [Service Connect](#).

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.
