Unit description

Marketing is a vital component to the success of any business. In a dynamic and competitive world, where consumers' preferences are changing rapidly, marketing helps a business gain insights into customers and how to create value that is unique and relevant for customers, the business, and society as a whole. Marketing ensures that value is communicated and delivered effectively to customers in order to generate sustainable profit. Thus, it is critical to understand the role, the contribution, and the process of marketing within an organisation. The focus of this unit is on developing students' knowledge of key marketing concepts and the marketing process in an organisation. Students will develop the skills to make strategic and tactical marketing decisions, and analyse the impacts of these decisions and their potential outcomes. Further, the unit will help students build the capabilities to apply the marketing concepts and tools to plan the marketing strategy and activities of a new business.
