Unit description
This unit covers concepts in investment management including asset pricing, fixed income, industry analysis and derivatives contracts. Students will acquire the analytical tools and financial theory necessary for making sound investment decisions and understanding the methodologies by which financial securities are valued. Students learn the principles of modern portfolio theories and apply them to empirical asset pricing models.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Illustrate the theory and empirical applications of asset pricing models.
ULO2: Analyse bond prices and yields.
ULO3: Explain macroeconomic and industry analysis, equity valuation and financial statement analysis.
ULO4: Formulate derivatives strategies to modify portfolio risk-return attributes.
ULO5: Work productively in a group to investigate a finance scenario or problem and communicate the findings and/or recommendations professionally.
