Unit description

This unit focuses on the role of accounting in governance and accountability. The link between accounting and governance is discussed through the concepts of measurement, valuation, conceptual framework, reporting and communication of financial and non-financial information. The unit also acquaints students with how to apply computerised accounting software to record financial transactions and adjust accounting entries, and to prepare bank reconciliation and financial statements. On the completion of this unit, students are expected to understand the role of accounting in discharging accountability, provide accounting treatment for assets, liabilities and equity, analyse and interpret financial statements, and understand the regulatory accounting environment. Critical, analytical and integrative thinking, problem solving, communication and teamwork skills are developed through treatments of accounting transactions and events, and the completion of a business report and group project.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>
