| Unit description | The unit provides an understanding of the finance industry and its integral role in the modern economy. The focus is on a high level, fully integrated overview of the major participants, their roles, interactions and the purpose they endeavour to fill for all stakeholders in the economy. The key structures of the finance system are examined, and how they usually work and sometimes do not work. Case studies of actual events and participants will be used to provide a sense of the application of finance in the real world - what actually happens as well as what should happen. |
