Unit description
What tools do cultural anthropologists use to observe humans and make sense of their actions in the world? This unit introduces the practical, methodological, and ethical dimensions of ethnographic research. As the primary goal of the unit is to teach students how to conduct ethnographic fieldwork, over the semester students engage in first-hand research projects where they regularly participate in and observe a cultural scene of their own choosing. Weekly meetings frame the fieldwork process as students learn anthropological research methods under the guidance of an experienced staff member, and then apply this knowledge to their ethnographic study. These meetings provide students an opportunity to share their fieldwork experiences with each other, discuss the methodological issues, and workshop concerns raised by their own studies. Simultaneously students will read several classic ethnographies to develop an understanding of the relationship between ethnographic research and ethnographic writing.

General Assessment Information

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of ‘0’ (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue. This late penalty will apply to non-timed sensitive assessment (incl essays, reports, posters, portfolios, journals, recordings etc). Late submission of time sensitive tasks (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special Consideration application.
