General Information

Unit convenor and teaching staff
Rachael Dudaniec
rachael.dudaniec@mq.edu.au

Credit points
10

Prerequisites
(BIOL1110 or BIOL115) and ((BIOL1310 or BIOL114) or (BIOL1210 or BIOL108) or (BIOL1610 or BIOL116) or (BIOL1620))

Corequisites
(STAT1170 or STAT170) or (STAT1371 or STAT171) or FOSE1015

Co-badged status
BIOL6110, BIOX2110

Unit description
Genetics occupies a central role in modern sciences, with profound implications for basic and applied research in biology, medicine and agriculture, as well as for a number of philosophical issues in human affairs. This unit offers a balanced approach to teach introductory principles of genetics. It combines sections on classical, molecular and population genetics presented in an integrative way. The practical sessions offer students the possibility of learning essential techniques and skills in modern molecular genetics.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Describe how genetic processes apply to agriculture, human health, society, and the environment
ULO2: Apply numeracy and basic principles of genetics to solve problems and draw conclusions from genetic data
ULO3: Describe routine techniques used to assay genetic variation in populations
ULO4: Demonstrate proficiency in the use of genetic research tools (pipettes, gel
ULO5: Analyse genetic data using some common population genetic software and bioinformatic tools
ULO6: Source, synthesise and critically evaluate information from the literature in written and oral formats

**General Assessment Information**

**Late Assessment Submission Penalty**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is **11:55 pm**. A 1-hour grace period will be provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for **Special Consideration**.

**Assessments where Late Submissions will be accepted or not accepted for Genetics:**

- Practical Report – YES, Standard Late Penalty applies
- Poster Presentation - YES, Standard Late Penalty applies
- Problem Sets - NO, unless special consideration is granted. Each problem set is worth 1% (5 in total) and there is 14 days to complete each one.
- Online Test - NO, unless special consideration is granted - this is a timed test assessment
- Exam - NO, unless special consideration is granted for a supplementary exam - this is a timed test assessment

**Hurdle Assessment**

**Final Exam (45%)**

Students will be tested on their knowledge of course content. The exam will include information from lectures, practical classes and assessment tasks up to and including week 13. The date for your final exam will be available later in the semester - the exam will be online multiple choice format. This is a hurdle assessment meaning that failure to achieve 45% in the final exam may result in a fail grade for the unit. Students who obtain between 35-44% in the final exam will be invited resit a supplementary exam at a designated time after the exam period.
Requirements to Pass this Unit

To pass this unit you must:

- Achieve at least 45% in the final examination (hurdle assessment)
- Achieve a total mark equal to or greater than 50%, including 45% in the final exam.

Further, it is considered essential that you attempt every assessment in this unit to pass. It is very difficult to pass this unit without attempting all of the assessments.

Problem Sets

Assessment Type 1: Problem set
Indicative Time on Task 2: 10 hours
Due: **Weeks 3,5,7,9,11**
Weighting: 5%

The problem sets are designed to assist you to understand topics covered in the course and to provide you with feedback on your understanding of those topics. It is essential that you complete the problem sets as the test and the final examination will cover similar topics to the problems. Answers to the problem sets will be provided. A good and reasonable attempt at each of the problem sets is required to obtain the full marks for each problem set (problems will not be individually graded).

On successful completion you will be able to:

- Apply numeracy and basic principles of genetics to solve problems and draw conclusions from genetic data
- Analyse genetic data using some common population genetic software and bioinformatic
A major component of this unit is the preparation of a practical report. This practical report should be presented in the style of a scientific publication and describe the procedures and results from the first two practical sessions. It is recommended that you start drafting your report at the commencement of the first practical session. In these practical sessions you will learn essential skills, including: how to isolate DNA, visualize DNA using gel electrophoresis, perform PCR amplification, and sequence a mitochondrial gene. You will learn to identify unknown DNA samples by comparing their sequences with those available in DNA sequence databases. After this, you will align all the DNA sequences collected and build a phylogenetic tree as a complementary method for species identification. Your report will include the activities undertaken within Practicals 1 and 2 within a scientific paper format, with Introduction, Methods, Results and Discussion.

On successful completion you will be able to:

- Describe how genetic processes apply to agriculture, human health, society, and the environment
- Demonstrate proficiency in the use of genetic research tools (pipettes, gel electrophoresis, sequence analysis)
- Analyse genetic data using some common population genetic software and bioinformatic tools
- Source, synthesise and critically evaluate information from the literature in written and oral formats

You are required to design and present a 3-minute scientific conference poster (design as a powerpoint slide with recorded presentation) on a topic in genetics that you find exciting, based
on a peer-reviewed scientific paper. The grade of your poster assessment will be based on content and presentation and involves peer evaluation.

On successful completion you will be able to:

• Describe how genetic processes apply to agriculture, human health, society, and the environment
• Describe routine techniques used to assay genetic variation in populations
• Source, synthesise and critically evaluate information from the literature in written and oral formats

Test
Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 10 hours
Due: May 18th
Weighting: 10%

Your progress during the unit will be assessed with a test that will focus on topics covered during the lectures and practical sessions. This test will require application of genetic principles to solve problems and an ability to describe genetic processes and techniques.

On successful completion you will be able to:

• Describe how genetic processes apply to agriculture, human health, society, and the environment
• Apply numeracy and basic principles of genetics to solve problems and draw conclusions from genetic data
• Describe routine techniques used to assay genetic variation in populations

Final Exam
Assessment Type 1: Examination
Indicative Time on Task 2: 25 hours
Due: Exam Period
Weighting: 45%
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

Students will be tested on their knowledge of course content. The exam will include information
from lectures, practical classes and assessment tasks up to and including week 13. The date for your final exam will be available later in the semester.

On successful completion you will be able to:

- Describe how genetic processes apply to agriculture, human health, society, and the environment
- Apply numeracy and basic principles of genetics to solve problems and draw conclusions from genetic data
- Describe routine techniques used to assay genetic variation in populations

1 If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

### Delivery and Resources

**Methods of Communication**

We will communicate with you via your university email address or through announcements on iLearn. Queries to convenors can either be placed on the iLearn discussion board or sent to genetics.biol2110@mq.edu.au from your university email address

**LECTURE SCHEDULE**

Lectures will be available each week online under the Echo360 link.

Lecture notes will be made available each week under the corresponding week tabs below.

<table>
<thead>

PRACTICAL SCHEDULE

On-campus practical sessions will run on Thursdays and Fridays during your allocated practical slot in either E8A 120 or E8A 160. Practical session materials will be made available on iLearn at the commencement of the week it is held.

NOTE: all practicals are on-campus except for the WEEK 11 - the Online Test. An online timeslot will be allocated for weekday students on May 18th, with alternative times to be arranged with the unit convenor via special consideration.
<table>

**COVID Information**

For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy
Students seeking more policy resources can visit Student Policies. It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct:

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian
Student Services and Support

Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
