Credit points
10

Prerequisites
130cp at 1000 level or above and CIVL2301

Corequisites

Co-badged status

Unit description
In this unit, students will be introduced to concrete structural design including material properties of concrete, section properties, design loads, and design requirements based on Australian Standards. This Unit provides the students with the skills to analyse the capacity of concrete sections in bending, shear, torsion, and the combination of these actions. Students will develop their ability to design reinforced concrete members based on their section capacities to sustain external loadings. They will gain an in-depth understanding of the difference between the actual and design loads, design safety, ultimate strength design and serviceability limit state. Specific topics include properties of concrete materials, concrete reinforcements, actions in concrete members, bending theory and stress block, requirements for bending, shear, and torsion capacities of reinforced concrete beams, columns and slabs, and prestressed concrete.

This unit provides an essential foundation for subsequent structural design project unit and research theses in the fourth year for students who would like to pursue more work in the structural engineering field.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates
Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: convey sound knowledge of the theory, concepts, and principles in concrete structural design
ULO2: comprehend the design of reinforced concrete sections under bending, shear and torsion
ULO3: perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
ULO4: communicate clearly and professionally the design outcomes of reinforced concrete structures
ULO5: demonstrate transferable skills (team player, self-management, time-management, professionalism, and compliance with ethical codes of conducts)

General Assessment Information

The Project task includes a group project assignment and some problem sets which are based on the lectures and lab contents.

Requirements to Pass this Unit

To pass this unit you must:

- Attempt all assessments, and
- Achieve a total mark equal to or greater than 50%, and
- Participate in, and undertake all hurdle activities for, a minimum of 9 of the 12 weekly workshops, and
- Achieve at least 50% in the final examination

Hurdle Assessments

Practice-based task (40% including Lab and Project-based activities)

Development of knowledge and skills requires continual practice at authentic problems in a laboratory-based setting. This unit has weekly laboratory/workshop classes and you must demonstrate your progress in developing and communicating knowledge and skills in a minimum of 9 of the 12 classes. This is a hurdle assessment meaning that failure to meet this requirement may result in a fail grade for the unit. Students are permitted up to three absences: additional absences will require a Special Consideration to be applied for (see below).
Special Consideration

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

If you receive special consideration for the final exam, a supplementary exam will be scheduled by the faculty during a supplementary exam period, typically about 3 to 4 weeks after the normal exam period. By making a special consideration application for the final exam you are declaring yourself available for a resit during the supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. Approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

Special Consideration for Practical-based Tasks

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment.

Written Assessments: If you experience circumstances or events that affect your ability to complete the written assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

Weekly practice-based tasks: To pass the unit you need to demonstrate ongoing development of skills and application of knowledge in 9 out of 12 of the weekly practical classes. If you miss a weekly practical class due to a serious, unavoidable and significant disruption, contact your convenor ASAP as you may be able to attend another class that week.

If it is not possible to attend another class, you should still contact your convenor for access to class material to review in your own time.

Note that a Special Consideration should **only be applied** if you miss more than three of the weekly practical classes.

**Assessment Tasks**

<table>

**Mid-Session Exam**

Assessment Type 1: Examination

Indicative Time on Task 2: 14 hours

Due: **Week 8**

Weighting: **20%**

Students will be given some problems during the exam, which will be invigilated.

On successful completion you will be able to:

- comprehend the design of reinforced concrete sections under bending, shear and torsion
- perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
• communicate clearly and professionally the design outcomes of reinforced concrete structures

Reinforced Concrete Design
Assessment Type 1: Project
Indicative Time on Task 2: 21 hours
Due: Weeks 4, 6, 10 & 12
Weighting: 40%

Project task includes a reinforced concrete design project and lab-based activities during practical classes.

On successful completion you will be able to:
• convey sound knowledge of the theory, concepts, and principles in concrete structural design
• comprehend the design of reinforced concrete sections under bending, shear and torsion
• perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
• communicate clearly and professionally the design outcomes of reinforced concrete structures
• demonstrate transferable skills (team player, self-management, time-management, professionalism, and compliance with ethical codes of conducts)

Final Examination
Assessment Type 1: Examination
Indicative Time on Task 2: 21 hours
Due: Final exam week
Weighting: 40%

Final examination assessing the content throughout the semester

On successful completion you will be able to:
• convey sound knowledge of the theory, concepts, and principles in concrete structural design
• comprehend the design of reinforced concrete sections under bending, shear and torsion
• perform qualitative and quantitative prediction of the design capacities of reinforced concrete members
• communicate clearly and professionally the design outcomes of reinforced concrete structures

1 If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources
Lectures 2 hours per week, on-line
Practicals 2 hours per week, starting from Week 1
SGTA 1 hour per week, starting from Week 1
Lecture notes will be provided in iLearn.

Note: Practicals are a combination of lab work and workshops for Q&A. Students will participate in the lab work for some weeks; the rest of the weeks will be for SGTA-small group teaching activities and practice problems.

Methods of Communication
We will communicate with you via your university email or through announcements on iLearn. Queries to convenors can either be placed on the iLearn discussion board or sent to UNITCOD E@mq.edu.au from your university email address.

COVID Information
For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during the semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.

Unit Schedule
Refer to the teaching material in iLearn for the Unit Schedule. All classes start in Week 1.

Policies and Procedures
Macquarie University policies and procedures are accessible from Policy Central (https://policie
Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Academic Integrity**

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.
Student Services and Support

Macquarie University offers a range of **Student Support Services** including:

- **IT Support**
- **Accessibility and disability support** with study
- **Mental health support**
- **Safety support** to respond to bullying, harassment, sexual harassment and sexual assault
- **Social support** including information about finances, tenancy and legal issues
- **Student Advocacy** provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via **AskMQ**, or contact **Service Connect**.

IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University’s IT, you must adhere to the **Acceptable Use of IT Resources Policy**. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

There is no change from the previous offering.

**Late Submission**

Online quizzes, in-class activities, or scheduled tests and exams must be undertaken at the time indicated in the unit guide.

All other assessments must be submitted by 5:00 pm (Sydney Time) on their due date unless stated otherwise.

Should these assessments be missed due to illness or misadventure, students should apply for Special Consideration.

Assessments not submitted by the due date will receive a mark in accordance with the Late
Assessment Submission Penalty as follows:

**Late Assessment Submission Penalty**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience technical concerns.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration.

**Assessments where Late Submissions will be accepted**

- Project – YES, Standard Late Penalty applies
- Mid-term and Final Exams - NO, unless Special Consideration is Granted

---

**On-campus Activities**

SGTA and Practical sessions are on-campus activities, starting from Week 1. Students who are unable to get back to campus in time please contact the Unit Convenor.
