Unit description

The overarching aim of this unit is to examine the implications of diversity in family values and the value of family across a range of contexts. Over the course of the unit, we will consider the role of socio-cultural, economic and political contexts in shaping family life and family values in the 21st century. Drawing on a variety of resources, including diverse media, academic publications and reflections on personal experiences, we will explore changing family lives and the extent to which traditional, largely Western-based, images of 'family' life reflect contemporary experiences and practices of families and children in Australia and abroad.

Important Academic Dates

5Rs Framework

The 5Rs Framework, developed by the School of Education at Macquarie University, is embedded throughout your teacher education course. Your use of the 5Rs Framework will help you develop the capabilities that will make your teaching career sustainable and fulfilling. In this unit, you will learn using the 5Rs framework in the following important ways:

Responsive - all modules - cover all family types. This allows you to think about the various ways we can build responsive relationships with families in our educational settings.

Ready to learn - the essay is set to challenge your thinking and how stereotypes are perpetuated.

Research engaged - the philosophy assessment provides opportunity to engage with the research. One of your modules is also on researching with families and the ethical considerations that need to be thought through. This module also provides opportunities to analyse who is missing in the research on working with families - what are the gaps/who is silenced and what does that mean for educational settings?
