Credit points
10

Prerequisites
50cp at 1000 level or above including ((STAT150 or STAT1250 or STAT170 or STAT1170 or STAT171 or STAT1371) and (ECON110 or ECON111 or ECON1020))

Corequisites

Co-badged status

Unit description
This unit introduces some basic econometric techniques employed by economists in the analysis of economic relationships. These techniques are also used extensively in marketing and finance. Topics covered will usually include: estimation and hypothesis testing; simple and multiple regression; prediction; the interpretation and evaluation of regression models, including an elementary discussion of nonlinear modelling, heteroscedasticity, autocorrelation, multicollinearity and specification error; and the use of categorical or qualitative data in regression models.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Analyse and apply key statistical concepts, including probability distributions, parameters and estimators, the sampling distribution of an estimator, point and interval estimation, and hypothesis testing.

ULO2: Specify, estimate and interpret a regression model.
ULO3: Summarise and interpret the estimation results, and draw valid inferences utilising hypothesis tests.
ULO4: Critically evaluate the assumptions of a classical (or standard) regression model and the consequences of violation of the assumptions.
ULO5: Employ an econometric software program to solve an econometric problem.

General Assessment Information

Late Assessment Submission Penalty (assignments)

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

Tutorial exercises

Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 10 hours
Due: Weekly (from Week 2)
Weighting: 10%

Each tutorial assessment covers material from previous lectures, with an emphasis on the most recent work.
On successful completion you will be able to:

• Specify, estimate and interpret a regression model.
• Summarise and interpret the estimation results, and draw valid inferences utilising hypothesis tests.
• Employ an econometric software program to solve an econometric problem.

Assignment 1
Assessment Type 1: Problem set
Indicative Time on Task 2: 16 hours
Due: Week 8
Weighting: 20%

A set of questions requiring both calculation and short written answers. It will be based on material covered in the lectures prior to the submission deadline.

On successful completion you will be able to:

• Specify, estimate and interpret a regression model.
• Summarise and interpret the estimation results, and draw valid inferences utilising hypothesis tests.
• Employ an econometric software program to solve an econometric problem.

Assignment 2
Assessment Type 1: Problem set
Indicative Time on Task 2: 16 hours
Due: Week 12
Weighting: 20%

A set of questions requiring both calculation and short written answers. It will be based on material covered in the lectures prior to the submission deadline.

On successful completion you will be able to:

• Specify, estimate and interpret a regression model.
• Summarise and interpret the estimation results, and draw valid inferences utilising hypothesis tests.
• Employ an econometric software program to solve an econometric problem.
Final examination

Assessment Type: Examination
Indicative Time on Task: 35 hours
Due: University Exam Period
Weighting: 50%

A two-hour examination, consisting of short answer questions that require both calculation and written responses, will be held during the University Examination Period.

On successful completion you will be able to:
- Analyse and apply key statistical concepts, including probability distributions, parameters and estimators, the sampling distribution of an estimator, point and interval estimation, and hypothesis testing.
- Summarise and interpret the estimation results, and draw valid inferences utilising hypothesis tests.
- Critically evaluate the assumptions of a classical (or standard) regression model and the consequences of violation of the assumptions.

1 If you need help with your assignment, please contact:
   - the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
   - the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation.

Delivery and Resources
See iLearn.

Policies and Procedures
Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:
- Academic Appeals Policy
- Academic Integrity Policy
Student Support

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
Unit guide ECON2041 Introductory Econometrics

• **Complete the Academic Integrity Module**

The Library provides online and face to face support to help you find and use relevant information resources.

• **Subject and Research Guides**
• **Ask a Librarian**

**Student Services and Support**

Macquarie University offers a range of **Student Support Services** including:

• **IT Support**
• **Accessibility and disability support** with study
• **Mental health support**
• **Safety support** to respond to bullying, harassment, sexual harassment and sexual assault
• **Social support including information about finances, tenancy and legal issues**
• **Student Advocacy** provides independent advice on MQ policies, procedures, and processes

**Student Enquiries**

Got a question? Ask us via AskMQ, or contact Service Connect.

**IT Help**

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

The policy applies to all who connect to the MQ network including students.
