Unit description
Why is economics the way it is? Are modern approaches to analysis related to past contributions? Has there been progress in economics, and how would we know? What is the place of the history of economic thought in the history of ideas more generally? The answer to these and many other fascinating questions form the focus of this unit. The unit considers history of economic thought from a non-standard and enlightening perspective. Rather than trace through the chronology of authors and schools of thought, the unit examines the evolution of theories and theoretical ideas from their origins (sometimes in antiquity), through to their modern forms. This puts the economics you have already learned into context and allows for a greater appreciation of the historical, social and philosophical influences on the development of economic thought. Topics may include: theories of value; theories of distribution; theories of growth; theories of cycles and fluctuations.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Identify the distinguishing characteristics of key schools of thought and stages in the development of economic theory.

ULO2: Evaluate the major theoretical approaches to the analysis of economic issues, the assumptions on which they are based, and their implications.
ULO3: Analyse and describe the important individual contributors to the development of economics.

ULO4: Exhibit the ability to interpret economic reasoning as presented in varying literary forms at different points in time.

ULO5: Show a clear capacity to critically assess and compare current and historical approaches to the development of economics.

**General Assessment Information**

**Late Assessment Submission Penalty (written assessments)**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55 pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration. Note that reflective blogs and discussions fall in this category.

As reflections will be based on unit content (recorded lectures) the marks for blogs will be affected by the amount of relevant content viewed. Watch rates of lecture videos will be tracked via ECHO360 and will partly determine marks for individual blogs. Note also that attendance at tutorials for which work is being submitted is necessary for the reflective component to be marked.

See the guides to assessment tasks available on ilear for more detail.
