# General Information

## Unit convenor and teaching staff

**Convenor**  
Yiqing Lu  
*yiqing.lu@mq.edu.au*  
3MD 137  
Fridays 3-5 pm

**Demonstrator**  
Shahidul Islam  
*shahidul.islam@mq.edu.au*

## Credit points

10

## Prerequisites

Admission to MEngElecEng

## Corequisites

20cp at 8000 level

## Co-badged status

## Unit description

This unit aims to provide students with the theory and hands-on experience in designing and implementing digital signal processing algorithms using software defined radio technology. The unit builds on from preceding Digital Signal Processing unit and introduces the software defined radio concept along with various software defined radio architectures and platforms. Topics covered include: sampling and quantisation, low-pass representation of bandpass systems, quadrature-signal representation, frequency translation, sample rate conversion, decimation and interpolation, direct and polyphase interpolator and decimator architectures, half-band FIR filters, digital up and down converters, matched filters and the software defined radio architectures and platforms. The unit culminates in a project where students develop a software defined radio technology-based solution from high-level functional specifications through to design, implementation and testing on real hardware.

# Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at [https://www.mq.edu.au/study/calendar-of-dates](https://www.mq.edu.au/study/calendar-of-dates)
Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Describe what a software defined radio platform is and its constituent functional components.

ULO2: Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.

ULO3: Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.

ULO4: Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.

ULO5: Prepare design documents and reports and communicate and explain design decisions.

General Assessment Information

Requirements to Pass this Unit

The entire assessment in this Unit is by Assignment 1 Report, Assignment 1 Oral Defense, Assignment 2 Report, Assignment 2 Oral Defense, Project Report, and an Oral Examination on the outcome of the Project. Passing this Unit requires an overall Mark of 50 out of 100. There is no Final Examination, and therefore there is no Supplemental Examination. There are no hurdle requirements.

Late Assessment Submission Penalty

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm Sydney Time. A 1-hour grace period will be provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration.

Resubmission of work is not allowed.

Assessments where Late Submissions will be accepted

Assignment/Project Reports - Yes, Standard Late Penalty applies
Defences - No, unless Special Consideration is Granted

If assessments are missed due to illness or misadventure, students should apply for
Special Consideration.

Special Consideration

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

Assignment 1

Assessment Type: Report
Indicative Time on Task: 20 hours
Due: Week 4
Weighting: 10%

Assignment 1 Report (1000 word equivalent)

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.
Defence 1
Assessment Type 1: Viva/oral examination
Indicative Time on Task 2: 5 hours
Due: Week 5
Weighting: 15%
An oral examination on the first part of the unit

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.

Assignment 2
Assessment Type 1: Report
Indicative Time on Task 2: 20 hours
Due: Week 8
Weighting: 10%
Assignment 2 Report (1000 word equivalent)

On successful completion you will be able to:

- Describe what a software defined radio platform is and its constituent functional components.
- Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
- Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
- Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
- Prepare design documents and reports and communicate and explain design decisions.
Defence 2
Assessment Type 1: Viva/oral examination
Indicative Time on Task 2: 5 hours
Due: Week 9
Weighting: 20%

An oral examination on the second part of the unit.

On successful completion you will be able to:
• Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
• Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
• Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
• Prepare design documents and reports and communicate and explain design decisions.

Project Report
Assessment Type 1: Report
Indicative Time on Task 2: 25 hours
Due: Week 12
Weighting: 15%

Project Report (2000-word equivalent)

On successful completion you will be able to:
• Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
• Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
• Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
• Prepare design documents and reports and communicate and explain design decisions.
Project Defence and Demonstration

Assessment Type 1: Viva/oral examination
Indicative Time on Task 2: 10 hours
Due: Week 13
Weighting: 30%

An oral examination of the outcomes of the project

On successful completion you will be able to:

• Describe what a software defined radio platform is and its constituent functional components.
• Comprehensively convey the advantages and limitations of various software-defined-radio-specific digital signal processing algorithms and their efficient implementations.
• Undertake quantitative performance analysis and contrast various digital signal processing algorithms and their implementations on software defined radio platforms.
• Design, implement and test digital signal processing algorithms on real software defined radio hardware platforms.
• Prepare design documents and reports and communicate and explain design decisions.

If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

The Unit will be delivered with a two-hour lecture, a one-hour SGTA, and a three-hour laboratory for each week. Lectures will be delivered online. SGTA and Practical Classes will be delivered on-campus. Lectures, SGTA and Practical Classes all start in Week 1.

If students have difficulty in attending on-campus SGTA or Practical Classes because they cannot get back to campus on time, they should contact the Unit Convenor as soon as possible.

The unit requires some project work with RTL-SDR devices manufactured by Nooelec, which are USB plug-in units for either laptop or desktop computers. Students are required to purchase their own RTL-SDR devices. For on-campus laboratory work, RTL-SDR devices will be available for use by students.
The software required is MATLAB and Simulink, which can be downloaded by Macquarie University students from the Mathworks Website for free.

Methods of Communication

We will communicate with you via your university email or through announcements on iLearn. Queries to convenors can either be placed on the iLearn discussion forum or sent to yiqing.lu@mq.edu.au from your university email address.

COVID Information

For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: https://www.mq.edu.au/about/coronavirus-faqs. Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be
made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity
At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre
The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

Student Services and Support
Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes
Student Enquiries
Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.
