Credit points
10

Prerequisites
(COMP115 or COMP1000) and (ENGG100 or ENGG1050)

Corequisites
CIVL2301 or (COMP247 or COMP2250) or (COMP225 or COMP2010) or (ELEC240 or
ELEC2040) or (ELEC242 or ELEC2042) or (ELEC260 or MTRN2060) or (ELEC270 or
ELEC2070) or (ELEC295 or ELCT2005) or (MECH203 or MECH2003)

Co-badged status

Unit description
The 4th SPINE unit aimed to develop professional, transferable and employability skills. The
Unit consists of a series of online modules and integrated project-based learning activities.

Students will be exposed to real engineering projects and be apply and integrate their learnt
technical skills in resolving a real-world inspired engineering problem. The working
environment will facilitate the development of transferable skills such as effective team
working skills and various form of technical communication skills.

Students are expected to apply systems thinking and design thinking in developing an
innovative and practical engineering solution for the given problem. They will be expected to
work alongside fellow senior students.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are
available at https://www.mq.edu.au/study/calendar-of-dates
Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Apply appropriate thinking strategies to achieve creative and innovative engineering solutions.

ULO2: Communicate technical information to a diverse range of audiences (including lay-people and experts in the field) using oral and written communication skills.

ULO3: Enumerate project parameters to effectively decompose complex engineering systems into subsystems such that they are objective and measurable.

ULO4: Work in a team and apply accountability strategies to ensure team objective is met.

ULO5: Apply rigour to the production of traceability documentation of the project.

ULO6: Demonstrate effective self-management ability and continual professional development.

General Assessment Information

Grading and passing requirements for unit

In order to pass this unit, a student must obtain a mark of 50 or more the unit (i.e. obtain a passing grade P/ CR/ D/ HD).

For further details about grading, please refer to the policies and procedures section.

Hurdle Requirements

There will be a "Fitness to Practice (FTP)" hurdle requirement that students must meet in order to pass this unit. Any students who do not meet the professionalism required of the Unit will first be warned formally via email and an in-person meeting. This includes following the given lab safety requirements and adherence to the COVID safety policy. For further details please refer to the policies and procedures section, specifically the Fitness to Practice Procedure.

Late Assessment Submission Penalty

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for
Assessment Tasks

Fitness to Practice Hurdle

Assessment Type 1: Practice-based task
Indicative Time on Task 2: 0 hours
Due: Throughout Session
Weighting: 0%
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

This non weighted hurdle requires students to demonstrate achievement and compliance with the Engineers Australia Stage 1 Competency. In particular, but not limited to Section 3: Professional and Personal Attributes. This is a "fitness to practice" demonstration task.

On successful completion you will be able to:
- Demonstrate effective self-management ability and continual professional development.

A1 Online materials

Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 10 hours
Due: Throughout Session

Special Consideration.
Assessments where Late Submissions will be accepted
Assessments: A1. Online materials, A5. Vertically Integrated Project - NO, unless Special Consideration is Granted
Resubmission of graded work will not be accepted.
Weighting: 20%

A range of topics delivered via podcasts, video recordings and other reading materials. Periodic online assessment around these topics. Material content will include but not limited to project management, team management, project organisation.

On successful completion you will be able to:

• Apply appropriate thinking strategies to achieve creative and innovative engineering solutions.
• Enumerate project parameters to effectively decompose complex engineering systems into subsystems such that they are objective and measurable.
• Work in a team and apply accountability strategies to ensure team objective is met.
• Apply rigour to the production of traceability documentation of the project.
• Demonstrate effective self-management ability and continual professional development.

A2. Reflective writing
Assessment Type 1: Reflective Writing
Indicative Time on Task 2: 5 hours
Due: Weeks 7 and 13
Weighting: 10%

Reflective writing on transferable skills learnt. There will be two required submission at two-time points in the semester. Refer to iLearn for more information.

On successful completion you will be able to:

• Work in a team and apply accountability strategies to ensure team objective is met.
• Demonstrate effective self-management ability and continual professional development.

A3. Portfolio
Assessment Type 1: Portfolio
Indicative Time on Task 2: 10 hours
Due: Week 13
Weighting: 10%

Continue professional development. A core part of the SPINE unit where students are to
continually improve on their Portfolio development.

On successful completion you will be able to:

• Demonstrate effective self-management ability and continual professional development.

A5. Vertically Integrated Project

Assessment Type 1: Practice-based task
Indicative Time on Task 2: 45 hours
Due: In parts throughout Session
Weighting: 60%

Working collectively as a team of engineers (different disciplines and years), students are to design, conceive, document, implement and communicate a detailed plan to a multi-disciplinary real-world inspired engineering problem. The work will have multiple subcomponents and milestone and will required teams to peer evaluate. More information on iLearn.

On successful completion you will be able to:

• Apply appropriate thinking strategies to achieve creative and innovative engineering solutions.
• Communicate technical information to a diverse range of audiences (including lay-people and experts in the field) using oral and written communication skills.
• Enumerate project parameters to effectively decompose complex engineering systems into subsystems such that they are objective and measurable.
• Work in a team and apply accountability strategies to ensure team objective is met.
• Apply rigour to the production of traceability documentation of the project.

1 If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation
Delivery and Resources

SGTAs will start in Week 1. You will need to be assigned to a group in week 1.

Communication with Teaching Staff:

To ensure a consistent experience with communication with teaching staff all unit based communication will be through either the public "Peer Assisted Learning Forum", or through the private "Important Private Message to Uni Contacts". Email should be avoided for unit related messages.

Unit Schedule

In week 1 students will form their groups. Due dates for all assessment tasks can be found on iLearn.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA
Academic Integrity
At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

Student Support
Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

The Writing Centre
The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

• Workshops
• Chat with a WriteWISE peer writing leader
• Access StudyWISE
• Upload an assignment to Studiosity
• Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

• Subject and Research Guides
• Ask a Librarian

Student Services and Support
Macquarie University offers a range of Student Support Services including:

• IT Support
• Accessibility and disability support with study
• Mental health support
• Safety support to respond to bullying, harassment, sexual harassment and sexual assault
• Social support including information about finances, tenancy and legal issues
• Student Advocacy provides independent advice on MQ policies, procedures, and processes
Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

In response to LEU and other student feedback from previous years, there has been a slight change to the due dates and workload requirement of the unit. Group creation will be different during this offering.

We value student feedback to be able to continually improve the way we offer our units. As such we encourage students to provide constructive feedback via student surveys, to the teaching staff directly, or via the FSE Student Experience & Feedback link in the iLearn page.
