5Rs Framework

The 5Rs Framework, developed by the School of Education at Macquarie University, is embedded throughout your teacher education course. Your use of the 5Rs Framework will help you develop the capabilities that will make your teaching career sustainable and fulfilling.

In this unit, you will learn using the 5Rs framework in the following important ways:

Resilience. In this unit, students are encouraged to form study groups and participate in online forums. Given the unit materials are fully online and can be accessed with time and location flexibility, students are encouraged to plan their study times, break down their major assessment to small parts and work through them progressively, and practise time management skills throughout the unit. Being able to draw on personal resources and social support, as well as managing time and multiple tasks, are important resilience skills.

Reflexive. In this unit, students will be asked to share their knowledge and professional experience on the topics of reading and writing. After learning about the topics in the unit, students are asked to critically evaluate and reflect on their knowledge and practice. It is important to reflect and challenge our existing beliefs and make effective and impactful decisions based on research evidence to ensure quality teaching outcomes.

Responsive. For the online discussion assessment, students are encouraged to provide meaningful and supportive feedback to each other. Throughout the unit, students are also asked to think about how their practice and their relationships to the community may impact their students and families.

Ready to learn. Students will learn the foundational and advanced knowledge of reading and writing development. This knowledge forms a basis for future learning and understanding of the principles for effective instruction in reading and writing. Students are encouraged to see this as a starting point, not an end point.

Research engaged. The importance of practice research-based instruction and making evidence-based decisions is embedded in all topics of the unit. In the main assessments, students will be given case scenarios and asked to provide appropriate assessments and instructions that are based on research.
