<tr>
<td>This unit may be taken concurrently with any Engineering Research Thesis A unit to allow deeper study of the thesis topic. Students should consider taking this unit (and ENGG4093) if they are doing an industry thesis, international thesis project, or are planning to go on to higher degree research. The expectations associated with workload and contribution in this unit supersede those in the required Engineering Research Thesis A unit (XXXX4090 or XXXX4092).</td>

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

- **ULO1**: Analyse a complex engineering problem, and propose solutions involving the development of new knowledge or the application of cutting edge techniques.
- **ULO2**: Plan a major engineering research project, including the design of necessary processes, information management, records keeping, project management, and
communications.

ULO3: Demonstrate an advanced knowledge of contextual factors, research direction, and foundational concepts from the engineering discipline of your specialisation.

ULO4: Apply core engineering principles and practices to a research or industry challenge.

ULO5: Demonstrate intellectual independence and an in-depth understanding of a specialist topic, through verbal and written communication.

General Assessment Information

Grading and passing requirement for unit

In order to pass this unit a student must obtain a mark of 50 or more for the unit (i.e. obtain a passing grade P/ CR/ D/ HD).

For further details about grading, please refer below in the policies and procedures section.

Hurdle Requirements

The Preliminary Thesis is a hurdle requirement. A grade of 50% or more on the Preliminary Thesis is a condition of passing this unit. If you are given a second opportunity to submit your thesis as a result of failing to meet the minimum mark required, your submission will be due during the supplementary examination period and will be notified of the exact day and time by the unit convenor. The second attempt at a hurdle assessment is graded as pass fail. The maximum grade for a second attempt is the hurdle threshold grade.

Regular meetings with thesis supervisor is a hurdle requirement. Students are required to attend at least 5 out of 10 weekly meetings from Week 4 to Week 13. See details in assessment task description.

Late submissions and Re-submissions

All assessments must be submitted by 23:59pm (Sydney Time) on their due date. Should the activities be missed due to illness or misadventure, students may apply for Special Consideration, as detailed below.

- **Preliminary Thesis Report**: Late penalty applies unless there is an approved special consideration request. Resubmissions are not allowed.

- **Presentation**: Late submissions are not allowed unless there is an approved special consideration request. Special considerations for presentations are approved only if there are long delays due to extenuating circumstances. Resubmissions are not allowed.

- **Logbooks (Management and Engagement)**: Late penalty applies unless there is an approved special consideration request. Resubmissions are not allowed.

Project Implementation
If your project requires on-campus lab attendance and you are not able to get back to campus on time, please contact with the unit convenor and your supervisor as soon as possible.

#### Research Plan

Assessment Type: Plan  
Indicative Time on Task: 5 hours  
Due: All Session  
Weighting: 0% 

This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

In this unit, development of knowledge and skills will be guided by regular interaction with your supervisor. You are strongly recommended to meet with your supervisor on a weekly basis, once the project commences. Weekly meetings should aim to seek feedback and steer the project, and would normally last at least 15-30 minutes or more. Meetings can be conducted using telephone or video-conference. Outcomes of a minimum of five meetings must be documented using the meeting log sheet provided on iLearn to meet this hurdle assessment task.

On successful completion you will be able to:

- Analyse a complex engineering problem, and propose solutions involving the development of new knowledge or the application of cutting edge techniques.
- Plan a major engineering research project, including the design of necessary processes, information management, records keeping, project management, and communications.
- Demonstrate an advanced knowledge of contextual factors, research direction, and foundational concepts from the engineering discipline of your specialisation.
- Apply core engineering principles and practices to a research or industry challenge.
- Demonstrate intellectual independence and an in-depth understanding of a specialist topic, through verbal and written communication.
Project Management

Assessment Type 1: Log book
Indicative Time on Task 2: 10 hours
Due: Week 13
Weighting: 10%

This assessment is made by the student's supervisor. It is comprised of the supervisor's judgement of self-management, engagement, intellectual independence, initiative, as well as judgement of the quality of record keeping & written log book. The logbook should contain dated records of day-to-day activities associated with the project.

On successful completion you will be able to:

• Analyse a complex engineering problem, and propose solutions involving the development of new knowledge or the application of cutting edge techniques.
• Plan a major engineering research project, including the design of necessary processes, information management, records keeping, project management, and communications.
• Demonstrate an advanced knowledge of contextual factors, research direction, and foundational concepts from the engineering discipline of your specialisation.
• Apply core engineering principles and practices to a research or industry challenge.
• Demonstrate intellectual independence and an in-depth understanding of a specialist topic, through verbal and written communication.

Presentation

Assessment Type 1: Presentation
Indicative Time on Task 2: 10 hours
Due: Week 14-16
Weighting: 20%

Students are required to deliver a comprehensive oral presentation about their project progress at the end of the unit.

On successful completion you will be able to:

• Analyse a complex engineering problem, and propose solutions involving the development of new knowledge or the application of cutting edge techniques.
• Plan a major engineering research project, including the design of necessary processes, information management, records keeping, project management, and communications.
• Demonstrate an advanced knowledge of contextual factors, research direction, and foundational concepts from the engineering discipline of your specialisation.
• Apply core engineering principles and practices to a research or industry challenge.
• Demonstrate intellectual independence and an in-depth understanding of a specialist topic, through verbal and written communication.

Preliminary Thesis
Assessment Type 1: Thesis
Indicative Time on Task 2: 50 hours
Due: Week 13
Weighting: 70%
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)

Students are required to prepare a preliminary thesis report about their projects, including the literature review, project planning & design, progress and achievements.

On successful completion you will be able to:
• Analyse a complex engineering problem, and propose solutions involving the development of new knowledge or the application of cutting edge techniques.
• Plan a major engineering research project, including the design of necessary processes, information management, records keeping, project management, and communications.
• Demonstrate an advanced knowledge of contextual factors, research direction, and foundational concepts from the engineering discipline of your specialisation.
• Apply core engineering principles and practices to a research or industry challenge.
• Demonstrate intellectual independence and an in-depth understanding of a specialist topic, through verbal and written communication.

1 If you need help with your assignment, please contact:
• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment
task and is subject to individual variation

**Delivery and Resources**

**Unit Delivery**

This is a project-based unit and has no scheduled lectures or tutorial sessions. Special lectures may be organised and related announcements will be made via iLearn.

**Logbook**

This unit requires a logbook. The students should maintain an individual logbook which should contain a dated log of day-to-day activities undertaken in relation to the project.

**Technology Used and Required**

The students are required to discuss with their supervisor about the software/hardware resources required for analysis, simulation, testing and experiments related to their project. In addition, word processing software (MS Word, Latex etc.) will be required to produce the preliminary thesis and MS PowerPoint or equivalent software will be required for presentation slides.

**Unit Webpage**

Access from the online iLearn System at http://ilearn.mq.edu.au

**Required and Recommended Texts/Materials**

There is not set textbook for this unit. The students are required to discuss with their supervisor regarding required/recommended reading materials, as suited to individual project needs.

**Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.
To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

### Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: [https://students.mq.edu.au/admin/other-resources/student-conduct](https://students.mq.edu.au/admin/other-resources/student-conduct)

### Results

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit [ask.mq.edu.au](http://ask.mq.edu.au) or if you are a Global MBA student contact [globalmba.support@mq.edu.au](mailto:globalmba.support@mq.edu.au)

### Academic Integrity

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

### Student Support

Macquarie University provides a range of support services for students. For details, visit [http://students.mq.edu.au/support/](http://students.mq.edu.au/support/)

#### The Writing Centre

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- **Workshops**
- **Chat with a WriteWISE peer writing leader**
- **Access StudyWISE**
- **Upload an assignment to Studiosity**
- **Complete the Academic Integrity Module**

The Library provides online and face to face support to help you find and use relevant information resources.

- **Subject and Research Guides**
- **Ask a Librarian**

### Student Services and Support

Macquarie University offers a range of Student Support Services including:
Student Enquiries
Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help
For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Engineers Australia Competency Mapping
