130cp at 1000 level or above including HLTH2301 or HLTH215

Corequisites

Co-badged status

Unit description

This unit continues to build on the knowledge base of pathophysiology acquired in Principles of Health and Disease. It examines the aetiology, epidemiology, pathophysiology, clinical presentation and differential diagnosis of common conditions of the nervous, musculoskeletal, renal, reproductive and integumentary systems. Case studies are used to develop the ability to create a differential diagnosis based on clinical presentation and examination. The complexity of disease is discussed within the biopsychosocial framework that will deepen student understanding of the complex relationship between ourselves and our environment.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Name the pathologies that can occur in the nervous, musculoskeletal, renal, reproductive and integumentary systems.

ULO2: For each disorder, describe its aetiology, epidemiology, pathogenesis, pathophysiological mechanisms, clinical manifestations, and explain the relationship between each.

ULO3: Differentiate between diseases on the basis of aetiology, pathogenesis, epidemiology, and clinical manifestations.

ULO4: Explain the multifactorial nature of the development of disease states.

ULO5: Demonstrate the fundamental skills required for decision-making and clinical reasoning on the basis of aetiology, pathophysiology, epidemiology and clinical manifestations

General Assessment Information

Assessment Tasks Description

Online Quizzes: Four (4) quizzes: 11 minute quizzes to be completed online in WEEKS 5, 9, 11 and 13 that will test **lecture and tutorial** material:

1. Quiz 1 in week 5: nervous system pathophysiology
2. Quiz 2 in week 9: musculoskeletal system pathophysiology
3. Quiz 3 in week 11: urinary system pathophysiology
4. Quiz 4 in week 13: reproductive and integumentary systems pathophysiology

The format will be 10 multiple choice questions. Each quiz will open on Monday at 8am and close on Sunday at 11pm of that week. There will be absolutely no opportunity to submit a quiz after the closing time as answers are released at that point. If you have technical difficulties, email your answers to your convenor and they will be manually marked. If you email these after the closing time, they will not be marked. The quizzes will have a time limit of 11 minutes, and there will be only one submission per student. The resultant mark will be an **AVERAGE of the 4 quiz marks (please note, NOT best x of 4)**.

Presentation: Students choose a question in that week's tutorial and give a presentation.

Each student will be given a date for their presentation in the tutorials this semester. The student must choose which of the questions in Activity One of their allocated tutorial they wish to do and make that known to the tutor as soon as possible, as allocation of questions is on a first come, first serve basis, and any one question can only be done by one presenting student. From week 3, ~4 students will give a 5-6minute presentation of their answer to their allocated question. Please pay careful attention to the assessment details and marking rubric provided in the unit

guide in this manual. Be sure to reference any material you use. Students are invited to ask questions at the conclusion of the presentation, and must take notes on the answers for their own study purposes.

Final examination: This will cover the lecture and tutorial content for the entire semester. It tests your knowledge of the theory, and the ability to connect that knowledge to real life situations (e.g., clinical presentations). It will consist of a 2 hour on-campus written exam with multiple choice questions, and case studies.

Assessment Tasks

Name	Weighting	Hurdle	Due
<u>Presentation</u>	20%	No	Allocated time in tutorials
<u>Online quizzes</u>	20%	No	Weeks 5, 9, 11 and 13
<u>Final Examination</u>	60%	No	End of semester official exam period

Presentation

Assessment Type ¹: Demonstration

Indicative Time on Task ²: 5 hours

Due: **Allocated time in tutorials**

Weighting: **20%**

Students choose a question or case study in that week's tutorial and give a presentation according to a rubric

On successful completion you will be able to:

- For each disorder, describe its aetiology, epidemiology, pathogenesis, pathophysiological mechanisms, clinical manifestations, and explain the relationship between each.
- Differentiate between diseases on the basis of aetiology, pathogenesis, epidemiology, and clinical manifestations.
- Explain the multifactorial nature of the development of disease states.
- Demonstrate the fundamental skills required for decision-making and clinical reasoning on the basis of aetiology, pathophysiology, epidemiology and clinical manifestations

Online quizzes

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 20 hours

Due: **Weeks 5, 9, 11 and 13**

Weighting: **20%**

The quizzes will be spread throughout the semester. Each quiz will cover material that has been delivered in lectures and/or tutorials.

On successful completion you will be able to:

- Name the pathologies that can occur in the nervous, musculoskeletal, renal, reproductive and integumentary systems.
- Differentiate between diseases on the basis of aetiology, pathogenesis, epidemiology, and clinical manifestations.
- Demonstrate the fundamental skills required for decision-making and clinical reasoning on the basis of aetiology, pathophysiology, epidemiology and clinical manifestations

Final Examination

Assessment Type ¹: Examination

Indicative Time on Task ²: 35 hours

Due: **End of semester official exam period**

Weighting: **60%**

This examination will cover the content delivered throughout the entire semester. Question format will be multiple choice and short answer.

On successful completion you will be able to:

- Name the pathologies that can occur in the nervous, musculoskeletal, renal, reproductive and integumentary systems.
- For each disorder, describe its aetiology, epidemiology, pathogenesis, pathophysiological mechanisms, clinical manifestations, and explain the relationship between each.
- Differentiate between diseases on the basis of aetiology, pathogenesis, epidemiology, and clinical manifestations.

- Explain the multifactorial nature of the development of disease states.
- Demonstrate the fundamental skills required for decision-making and clinical reasoning on the basis of aetiology, pathophysiology, epidemiology and clinical manifestations

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](#) for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

Delivery mode

This unit is characterised by a moderate degree of flexibility. It incorporates a variety of learning tools and media. It will comprise:

	ACTIVITY	Total
Lectures	1 × 2 hour lecture per week pre-recorded online: time set aside is Tuesday 1-3pm	2 hours per week, weeks 1-12
Tutorials	1 × 2 hours tutorial class per week, weeks 2 – 12 Tutorials are on campus. Note that you must attend just one tutorial a week: Choose from Wednesday 12 – 2pm or 2 – 4pm, or Thursday 10 – 12, 12 – 2, 2 – 4 or 4 – 6pm. All tutorials are at 4 Western road, room 220.	2 hours per week, weeks 2-12
Other	Revision, self-instructional learning, preparation for tutorials and readings from the manual/text	6 - 8 hours per week

Please note that the venues are subject to change until just before the start of the semester. So, for further details on class time and locations for this unit follow the link below:

http://students.mq.edu.au/student_admin/timetables

Unit Web Page

You can log in to [iLearn](#) System via the link listed below:

<https://ilearn.mq.edu.au/login/MQ/>

Your username is your student MQID. Your MQID and password have been mailed to you by the university. If you have lost them, go to the student portal: <http://students.mq.edu.au/home>

All lecture materials will be posted on ilearn. There is also a link to ECHO360 for **audio** recordings of the lectures, and the powerpoint is uploaded into the lecture timetable.

Required and recommended resources

Required:

1. *HLTH3303/CHIR6303 Tutorial Course Manual 2023* – This has been uploaded to iLearn. Please be sure to either download, print and bind the manual, or have an iPad or laptop to access the manual during the tutorial.
2. Craft JA *et al* (2018) *Understanding Pathophysiology ANZ*, 3rd Edition, Elsevier Australia.

Recommended:

- McCance KL *et al* (2019) *Pathophysiology – The biologic basis of disease in adults and children*, 8th Edition, Elsevier Australia.

A note about textbooks:

Textbooks for this unit can be purchased online from Booktopia <https://www.booktopia.com.au/coop>

The list of Macquarie University S1 2021 units and texts can be found on the [Booktopia website](#).

Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://policies.mq.edu.au) (<https://policies.mq.edu.au>). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- [Academic Appeals Policy](#)
- [Academic Integrity Policy](#)
- [Academic Progression Policy](#)
- [Assessment Policy](#)
- [Fitness to Practice Procedure](#)
- [Assessment Procedure](#)
- [Complaints Resolution Procedure for Students and Members of the Public](#)

- [Special Consideration Policy](#)

Students seeking more policy resources can visit [Student Policies \(https://students.mq.edu.au/support/study/policies\)](https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit [Policy Central \(https://policies.mq.edu.au\)](https://policies.mq.edu.au) and use the [search tool](#).

Student Code of Conduct

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: <https://students.mq.edu.au/admin/other-resources/student-conduct>

Results

Results published on platform other than [eStudent](#), (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in [eStudent](#). For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

Academic Integrity

At Macquarie, we believe [academic integrity](#) – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free [online writing and maths support](#), [academic skills development](#) and [wellbeing consultations](#).

Student Support

Macquarie University provides a range of support services for students. For details, visit <http://students.mq.edu.au/support/>

The Writing Centre

[The Writing Centre](#) provides resources to develop your English language proficiency, academic writing, and communication skills.

- [Workshops](#)
- [Chat with a WriteWISE peer writing leader](#)
- [Access StudyWISE](#)
- [Upload an assignment to Studiosity](#)
- [Complete the Academic Integrity Module](#)

The Library provides online and face to face support to help you find and use relevant information resources.

- [Subject and Research Guides](#)

- [Ask a Librarian](#)

Student Services and Support

Macquarie University offers a range of [Student Support Services](#) including:

- [IT Support](#)
- [Accessibility and disability support](#) with study
- Mental health [support](#)
- [Safety support](#) to respond to bullying, harassment, sexual harassment and sexual assault
- [Social support including information about finances, tenancy and legal issues](#)
- [Student Advocacy](#) provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via [AskMQ](#), or contact [Service Connect](#).

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Inclusion and Diversity

Social inclusion at Macquarie University is about giving everyone who has the potential to benefit from higher education the opportunity to study at university, participate in campus life and flourish in their chosen field. The University has made significant moves to promote an equitable, diverse and exciting campus community for the benefit of staff and students. It is your responsibility to contribute towards the development of an inclusive culture and practice in the areas of learning and teaching, research, and service orientation and delivery. As a member of the Macquarie University community, you must not discriminate against or harass others based on their sex, gender, race, marital status, carers' responsibilities, disability, sexual orientation, age, political conviction or religious belief. All staff and students are expected to display appropriate behaviour that is conducive to a healthy learning environment for everyone

Professionalism

In the Faculty of Medicine, Health and Human Sciences, professionalism is a key capability embedded in all our courses.

As part of developing professionalism, students are expected to attend all small group interactive sessions including clinical, practical, laboratory, work-integrated learning (e.g., PACE placements), and team-based learning activities. Some learning activities are recorded (e.g.,

face-to-face lectures), however you are encouraged to avoid relying upon such material as they do not recreate the whole learning experience and technical issues can and do occur. As an adult learner, we respect your decision to choose how you engage with your learning, but we would remind you that the learning opportunities we create for you have been done so to enable your success, and that by not engaging you may impact your ability to successfully complete this unit. We equally expect that you show respect for the academic staff who have worked hard to develop meaningful activities and prioritise your learning by communicating with them in advance if you are unable to attend a small group interactive session.

Another dimension of professionalism is having respect for your peers. It is the right of every student to learn in an environment that is free of disruption and distraction. Please arrive to all learning activities on time, and if you are unavoidably detained, please join activity as quietly as possible to minimise disruption. Phones and other electronic devices that produce noise and other distractions must be turned off prior to entering class. Where your own device (e.g., laptop) is being used for class-related activities, you are asked to close down all other applications to avoid distraction to you and others. Please treat your fellow students with the utmost respect. If you are uncomfortable participating in any specific activity, please let the relevant academic know.
