Unit description
This unit introduces public international law’s key principles, rules, and concepts, examining how they shape contemporary international relations. It addresses the formation of international law, exploring particularly the processes of treaty negotiation and creation, and the development of customary international law. The unit explores the rights and responsibilities of states vis-a-vis each other, their own nationals and those of other states, the limits of state jurisdiction, state and diplomatic immunity, international dispute settlement, international use of force. The unit also examines the impact of international law on the Australian legal system. In covering these areas students explore how international law seeks to resolve real problems facing the international community.
