Corequisites

Co-badged status
MATH2055

Unit description
The idea of a vector space first introduced in MATH1020 and MATH1025 is enriched in this unit by the introduction of an inner product. This leads to the important notion of orthogonality that underpins many areas of mathematics. The idea of linear transformations which transfer linearity from one space to another is also discussed. The results and techniques are then applied to problems such as approximation, quadratic forms and Fourier series. Differential and integral calculus involving functions of two real variables introduced in MATH1020 and MATH1025 are generalised to multivariable calculus including vector-valued functions, multivariable Taylor approximations, constrained optimization and multiple integrals in various coordinate systems. The ideas introduced in the unit are central to the development of many areas of modern areas of mathematics and to mathematical modelling of real world phenomena encounter in scientific and engineering problems.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
ULO2: Formulate and solve simple physical problems through the use of linear techniques.

ULO3: Develop multiple representations for a system and justify the best choice physically (e.g. Fourier Series).

ULO4: Successfully communicate how the mathematical methods developed in the unit relate to real world systems.

General Assessment Information

Requirements to Pass this Unit
To pass this unit you must:

• Achieve a total mark equal to or greater than 50%, and
• Participate in a minimum of 10 of the 12 weekly SGTA classes.

Weekly quizzes
• Nine weekly quizzes in weeks 2-4, 6-10 and 12. Each quiz is worth 2% with a maximum of 16% going towards the unit assessment (best eight results).

Hurdle Assessments
Assessment 1: Practice-based task (0%)
Development of knowledge and skills requires continual practice. During SGTA's you will practice a range of mathematical techniques. To pass this hurdle assessment, you must be able to demonstrate your progress in developing and communicating knowledge and skills in 10 of the 12 SGTA's. This is a hurdle assessment meaning that failure to meet this requirement may result in a fail grade for the unit. Students are permitted up to three absences: additional absences will require a Special Consideration to be applied for (see below).

Late Assessment Submission Penalty
Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark of the task) will be applied for each day a written report or presentation assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. The submission time for all uploaded assessments is 11:55 pm. A 1-hour grace period will be provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, please apply for Special Consideration.

Assessments where Late Submissions will be accepted
• Assessment - Assignment Week 12 – YES, Standard Late Penalty applies;
• Assessment – Test1 – NO, unless Special Consideration is Granted;
• Assessments – Test2 – NO, unless Special Consideration is Granted;
• Assessments – Weekly Quizzes – NO, unless Special Consideration is Granted.
**Special Consideration**

The Special Consideration Policy aims to support students who have been impacted by short-term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

Written Assessments/Quizzes/Tests: If you experience circumstances or events that affect your ability to complete the written assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

Participation in SGTA classes: To pass the unit you need to demonstrate ongoing development of skills and application of knowledge in 10 out of 12 of the weekly SGTA classes. If you miss a weekly SGTA class due to a serious, unavoidable and significant disruption, contact your convenor ASAP as you may be able to attend another class that week. If it is not possible to attend another class, you should still contact your convenor for access to class material to review in your own time. Note that a Special Consideration should only be applied for if you miss more than two of the weekly practical classes.

**Participation in SGTA classes**

Assessment Type: Practice-based task
Indicative Time on Task: 0 hours
Due: 10 out of 12 weeks
Weighting: 0%
This is a hurdle assessment task (see assessment policy for more information on hurdle assessment tasks)
Development of knowledge and skills requires continual practice. During SGTAs you will practice a range of mathematical techniques. To pass this hurdle assessment, you must be able to demonstrate your progress in developing and communicating knowledge and skills in 10 out of 12 SGTAs.

On successful completion you will be able to:

• Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
• Formulate and solve simple physical problems through the use of linear techniques.
• Develop multiple representations for a system and justify the best choice physically (eg. Fourier Series).
• Successfully communicate how the mathematical methods developed in the unit relate to real world systems.

Weekly Quiz
Assessment Type 1: Quiz/Test
Indicative Time on Task 2: 9 hours
Due: 11:55pm on Sunday's
Weighting: 16%

The subject will have nine weekly online (iLearn) quizzes containing one to three short questions. The quizzes will last for one hour, and be available for a duration of one week. The quizzes will not run in Week 1, or weeks containing a midterm test. Each quiz is worth 2%, with the best eight quizzes counted to the overall grade.

On successful completion you will be able to:

• Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
• Formulate and solve simple physical problems through the use of linear techniques.
• Develop multiple representations for a system and justify the best choice physically (eg. Fourier Series).
• Successfully communicate how the mathematical methods developed in the unit relate to real world systems.

Test 2
Assessment Type 1: Quiz/Test
Indicative Time on Task: 7 hours
Due: Week 11
Weighting: 12%

This will test the ability of students to analyse and solve mathematical problems using concepts and techniques in linear algebra and calculus.

On successful completion you will be able to:
- Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
- Formulate and solve simple physical problems through the use of linear techniques.
- Develop multiple representations for a system and justify the best choice physically (e.g. Fourier Series).
- Successfully communicate how the mathematical methods developed in the unit relate to real world systems.

Test 1
Assessment Type: Quiz/Test
Indicative Time on Task: 7 hours
Due: Week 5
Weighting: 12%

This will test the ability of students to analyse and solve mathematical problems using concepts and techniques in linear algebra and calculus.

On successful completion you will be able to:
- Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
- Formulate and solve simple physical problems through the use of linear techniques.
- Develop multiple representations for a system and justify the best choice physically (e.g. Fourier Series).
- Successfully communicate how the mathematical methods developed in the unit relate to real world systems.
Assignment
Assessment Type 1: Problem set
Indicative Time on Task 2: 7 hours
Due: end of Week 12
Weighting: 10%

One assignment submitted electronically

On successful completion you will be able to:
- Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
- Formulate and solve simple physical problems through the use of linear techniques.
- Develop multiple representations for a system and justify the best choice physically (eg. Fourier Series).
- Successfully communicate how the mathematical methods developed in the unit relate to real world systems.

Final exam
Assessment Type 1: Examination
Indicative Time on Task 2: 15 hours
Due: exam period
Weighting: 50%

Held during the final exam period. It will test the ability of students to synthesise the concepts taught in the course in order to analyse and solve mathematical problems with various applications.

On successful completion you will be able to:
- Determine the rates of change of systems that vary over space and time and construct approximate representations for them (multi-variable Taylor series).
- Formulate and solve simple physical problems through the use of linear techniques.
- Develop multiple representations for a system and justify the best choice physically (eg. Fourier Series).
- Successfully communicate how the mathematical methods developed in the unit relate to
real world systems.

1 If you need help with your assignment, please contact:
   - the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
   - the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

**Delivery and Resources**

**Classes**

Lectures (beginning in Week 1): There are two one-hour lectures each week.

SGTA classes (beginning in Week 2): Students must register in and attend one two-hour class per week. This is a hurdle requirement. Missing more than two SGTA classes will result in failure of the unit.

**Suggested textbooks**

The following textbooks are useful as supplementary resources, for additional questions and explanations. They are available from the Macquarie University library:

**Methods of Communication**

We will communicate with you via your university email or through announcements on iLearn. Queries to convenors can either be placed on the iLearn discussion board or sent to your lecturers from your university email address.

**COVID Information**

For the latest information on the University’s response to COVID-19, please refer to the Coronavirus infection page on the Macquarie website: [https://www.mq.edu.au/about/coronavirusfaq](https://www.mq.edu.au/about/coronavirusfaq). Remember to check this page regularly in case the information and requirements change during semester. If there are any changes to this unit in relation to COVID, these will be communicated via iLearn.
## Unit Schedule

<table>
<thead>
<tr>
<th>WEEK</th>
<th>Topic</th>
<th>Task Due</th>
</tr>
</thead>
</table>
| 1    | *Stream 1 - Calculus*  
| 2    | Limits and continuity in one and many variables. Arithmetic of limits.  
Polar coordinates. | Week 2 quiz           |
| 3    | Partial derivatives, directional derivatives, and gradients for real-valued and vector-valued functions. | Week 3 quiz           |
| 4    | Multivariate differentiability. Arithmetic of differentiable functions.  
The chain rule. Tangent and normals to level-sets. | Week 4 quiz           |
Finding local extrema. Constrained optimisation (Lagrange multipliers). | Test 1                |
| 6    | Multiple integration. Fubini's theorem. Double integrals over irregular regions.  
Change of coordinates for multiple integrals. | Week 6 quiz           |
|      | *Stream 2 - Algebra*  
Systems of linear equations; vector spaces; subspaces; basis; dimension |                       |
| 7    | Change of basis; linear transformations; matrices for linear transformations | Week 7 quiz           |
| 8    | Kernel and range of linear transformation; column space;  
eigenvalues and eigenspaces of linear transformations; matrices of linear transformations in different bases | Week 8 quiz           |
| 9    | Similar matrices, diagonalisation; inner product; norm; orthogonality; Fourier series | Week 9 quiz           |
| 10   | Gram-Schmidt process, orthogonal and symmetric matrices, quadratic forms, orthogonal subspaces | Test 2                |
| 11   | Orthogonal projections, least squares approximations, and complex vector spaces | Assignment and Week 12 quiz |
| 12   | Revision.                                                             |                       |

### Policies and Procedures

Macquarie University policies and procedures are accessible from [Policy Central](https://policie)
Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Academic Integrity**

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.
Student Services and Support

Macquarie University offers a range of Student Support Services including:

- IT Support
- Accessibility and disability support with study
- Mental health support
- Safety support to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- Student Advocacy provides independent advice on MQ policies, procedures, and processes

Student Enquiries

Got a question? Ask us via AskMQ, or contact Service Connect.

IT Help

For help with University computer systems and technology, visit http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/.

When using the University’s IT, you must adhere to the Acceptable Use of IT Resources Policy. The policy applies to all who connect to the MQ network including students.

Changes from Previous Offering

We value student feedback to be able to continually improve the way we offer our units. As such we encourage students to provide constructive feedback via student surveys, to the teaching staff directly, or via the FSE Student Experience & Feedback link in the iLearn page. Student feedback from the previous offering of this unit was very positive overall, with students pleased with the clarity around assessment requirements and the level of support from teaching staff. As such, no change to the delivery of the unit is planned, however we will continue to strive to improve the level of support and the level of student engagement.
