Unit description

This unit focuses on the principles of starting-up a new business venture. Throughout the session we will discuss and critically reflect upon the economic, technological, societal, and global dimensions of entrepreneurship, and explore a range of concepts, models and approaches that represent the theory of entrepreneurship. You will apply this knowledge to practice by working in teams to experience multiple aspects of a new venture start-up. These will include ethical, societal and financial considerations, the creativity of developing a business idea, the development and formulation of a business model and plan, as well as unique marketing issues, ownership, growth and global aspects of entrepreneurship. Successful completion of the unit will provide you with knowledge and tools that will support you in your own entrepreneurial endeavours.
