Unit description

This unit will consider practices and experiences of mobility, focusing on contemporary technologies and cultures. Mobile and ubiquitous media technologies, particularly mobile phones, and the cultural practices and meanings around their development and use, will be a particular focus of discussion. What cultural assumptions underpin the development of mobile technologies and apps, and the platforms they draw on. What forms of identity, understandings of the body, and ways of using these technologies, are offered to those using mobile technologies, and how might these be changing? What are the cultural meanings of the way data flows from mobile technologies to users' peers, professionals, governments and corporations. How do these flows of data enhance or undermine justice, shape bodies and relationships.

This consideration of technologies of mobility, and the identities linked to them, will be framed within broader considerations of the cultural consequences of media; "travelling ideas"; and movements of people, migrants, tourist and refugees.

## Changes since First Published

Date	Description
23/07/2023	There were two typos in the assessment dates - one of which made deadline later than the final marks meeting. Apologies, I am experiencing a family crisis at the moment and so my proofreading eye is not as good as it should be.
