Unit description
This unit will explore various theoretical and practical issues raised by a single important recent theme in philosophy, such as the nature of the self or the impacts of technology. The unit will explore this theme from a variety of perspectives by looking at the relevant metaphysical and epistemological, ethical and moral, and political and social issues it raises. The unit’s topics and themes may differ from year to year but will not replicate those covered in Research Topics in Philosophy II. Students will be exposed to important philosophical debates so that they are able to begin to pursue their own research projects.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: understand issues discussed in the contemporary philosophical literature
ULO2: analyse philosophical arguments
ULO3: evaluate philosophical arguments
ULO4: communicate clearly your own perspective on the philosophical issues examined in this unit

General Assessment Information

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of 0 (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue.

This late penalty will apply to non-timed sensitive assessment (incl essays, reports, posters, portfolios, journals, recordings etc). Late submission of time sensitive tasks (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs etc) will only be addressed by the unit convenor in a Special consideration application. Special Consideration outcome may result in a new question or topic.

Basic computer skills (e.g., internet browsing) and skills in word processing are also a requirement. Please consult teaching staff for any further, more specific requirements.

Unit Schedule

Weeks: 1 - 6 New Directions in Philosophical Methodology: Conceptual Engineering

With Dr. Paul-Mikhail Catapang Podosky

Synopsis: The question of what is contained within the proper bounds of philosophy is contested. In recent history, philosophy was considered, at least for the most part, to be simply conceptual analysis. There are different ways to spell out what this kind of analysis involves, ranging from consulting one's intuitions about the meaning of terms to quasi-empirical investigation into the vagaries of ordinary linguistic usage within a community. In this section of the course, we will explore an emerging form of conceptual analysis that does not strictly concern itself with descriptive questions about the meaning of terms or the content of concepts. It instead asks: What concepts should we have? This way of doing philosophy has been dubbed conceptual engineering. Specifically, we'll examine how conceptual engineering has been used to grapple with core justice-related questions concerning race, gender, sexual orientation, disability, animal ethics, and so forth. We shall also look at how we can implement conceptual innovations in our everyday thinking and speaking practices, and related to the next section, how cinema might play a key role in this process.

• Week 1: What is Conceptual Engineering?
• Week 2: Political Conceptual Engineering
• Week 3: Engineering Gender
• Week 4: Engineering Race
Weeks: 7 - 12 Visible Arguments: Documentary as Philosophy

With Associate Professor Robert Sinnerbrink

Synopsis: In this section of the course we will look at recent philosophical approaches to cinema and the idea of cinematic ethics: cinema as a medium of ethical experience. We commence by examining philosophical and ethical perspectives on documentary before turning to explore a range of contemporary documentaries. We shall focus on a range of philosophical, ethical, political, and ecological topics, problems, and issues through a combination of philosophical readings and film viewings, examining the ways in which non-fictional/documentary films can contribute to philosophical and ethical understanding via cinematic means.

- Week 7: What is Documentary? Philosophical and Ethical Perspectives
- Week 8: Philosophical Documentaries
- Week 9: Animals on Film I
- Week 10: Animals on Film II
- Week 11: Visible Arguments: Hypernormalisation
- Week 12: Ecocritical Cinema: Ecological Threats and the Anthropocene
