Unit description

This unit involves the study of how humans grow and change across the life span from conception until death. The unit consolidates and extends topics introduced in the developmental section of PSYX1105. We explore developmental continuities and changes that are normative and common to most people, but also ways in which people differ from one another. In particular we focus on theories that seek to explain development and the extent to which development is influenced by genes, the physical environment, social relationships, and the context in which the individual lives. We survey major theories, research findings, and contemporary issues in physical, cognitive, social-emotional, and personality development across the life span. The tutorial sessions complement the lectures and focus on developmental research methodologies and practical applications of developmental theory.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

Learning Outcomes

On successful completion of this unit, you will be able to:

ULO1: Recall, recognise and describe key concepts of the major developmental theories.

ULO2: Describe the processes of development from conception through pregnancy, childhood, adolescence and adulthood.

ULO3: Apply developmental theories to various real-life scenarios to explain or predict observed human behaviour at different stages across the lifespan.

ULO4: Collect, integrate and critically evaluate a body of developmental research literature on a specified developmental topic.

General Assessment Information

Grade descriptors and other information concerning grading are contained in the [Macquarie University Assessment Policy](#).

All final grades are determined by a grading committee, in accordance with the Macquarie University Assessment Policy, and are not the sole responsibility of the Unit Convenor.

Students will be awarded a final grade and a mark which must correspond to the grade descriptors specified in the [Assessment Procedure](#) (clause 128).

To pass this unit, you must demonstrate sufficient evidence of achievement of the learning outcomes, meet any ungraded requirements, and achieve a final mark of 50 or better.

For word count penalties, 5% of the possible mark will be deducted per 100 words over the word limit for written assessment tasks. An additional 99 words beyond the limit can be written without

penalty.

All extensions need to be formally requested via ask.mq.edu.au in line with the special consideration policy.

The final exam for this unit will occur on Macquarie University campus. Students are expected to make themselves available for the final exam, at the date and time set by the University, in line with the Assessment Policy and Procedure. Sitting the final exam is compulsory in order to be eligible to pass the unit. Any student who does not attempt the final exam will be granted a Fail Absent grade.

Supplementary assessment tasks will only be provided following an approved Special Consideration application, and only when appropriate. Supplementary assessment tasks, including supplementary exams, can be in a different format to the original assessment task.

Further details for each assessment task will be available on iLearn.

Late Submissions

Unless a Special Consideration request has been submitted and approved, a 5% penalty (OF THE TOTAL POSSIBLE MARK) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For example:

Number of days (hours) late	Total Possible Marks	Deduction	Raw mark	Final mark
1 day (1-24 hours)	100	5	75	70
2 days (24-48 hours)	100	10	75	65
3 days (48-72 hours)	100	15	75	60
7 days (144-168 hours)	100	35	75	40
>7 days (>168 hours)	100	-	75	0

Please note no submissions will be accepted after marked assignments are returned and feedback is released to students.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

Assessment Tasks

Name	Weighting	Hurdle	Due
Open Quiz	10%	No	During Week 7 (available 9am Mon 4 Sept to 5pm Fri 8 Sept)
Literature Review	40%	No	Wed 20 Sept 11:55pm
Final Examination	50%	No	During Final Exam Period

Open Quiz

Assessment Type ¹: Quiz/Test

Indicative Time on Task ²: 8 hours

Due: **During Week 7 (available 9am Mon 4 Sept to 5pm Fri 8 Sept)**

Weighting: **10%**

Open book multiple choice quiz of 20 questions completed online in 45 minutes

On successful completion you will be able to:

- Recall, recognise and describe key concepts of the major developmental theories.
- Apply developmental theories to various real-life scenarios to explain or predict observed human behaviour at different stages across the lifespan.

Literature Review

Assessment Type ¹: Literature review

Indicative Time on Task ²: 40 hours

Due: **Wed 20 Sept 11:55pm**

Weighting: **40%**

Students complete a 1500 word literature review on theory and research related to a particular developmental phenomenon.

On successful completion you will be able to:

- Describe the processes of development from conception through pregnancy, childhood,

adolescence and adulthood.

- Apply developmental theories to various real-life scenarios to explain or predict observed human behaviour at different stages across the lifespan.
- Collect, integrate and critically evaluate a body of developmental research literature on a specified developmental topic.

Final Examination

Assessment Type ¹: Examination

Indicative Time on Task ²: 40 hours

Due: **During Final Exam Period**

Weighting: **50%**

Multiple choice examination of 100 questions to be completed in 2 hours

On successful completion you will be able to:

- Recall, recognise and describe key concepts of the major developmental theories.
- Describe the processes of development from conception through pregnancy, childhood, adolescence and adulthood.
- Apply developmental theories to various real-life scenarios to explain or predict observed human behaviour at different stages across the lifespan.

¹ If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the [Writing Centre](#) for academic skills support.

² Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

As a student enrolled in this unit, you will engage in a range of learning activities, including lectures and tutorials, as well as readings and videos. Students can enroll in either an on-campus lecture (space permitting) or an online/live-streamed lecture (access via Echo360). Tutorial classes are held on campus only and commence in Week 2 for Stream A and Week 3 for Stream B. Please attend your scheduled tutorial class time.

Please note students should not attend on-campus classes if they are unwell or have any cold and flu-like symptoms.

Further details can be found on the iLearn site for this unit.

Textbook

A custom textbook has been developed for this unit. *Please consult the unit schedule below and on iLearn for week-to-week prescribed readings.*

Students can purchase a print version of the textbook [here](#) or digital version of the textbook [here](#). An e-version of the textbook is also available for loan through the Macquarie University library via this [link](#) and Leganto. See iLearn for more information.

Technology Used

Active participation in the learning activities throughout the unit will require students to have access to a tablet, laptop or similar device. Students who do not own their own laptop computer may borrow one from the university library.

When using the University's IT, you must adhere to the [Acceptable Use of IT Resources Policy](#). The policy applies to all who connect to the MQ network including students.

Inclusion and Diversity

Social inclusion at Macquarie University is about giving everyone who has the potential to benefit from higher education the opportunity to study at university, participate in campus life and flourish in their chosen field. The University has made significant moves to promote an equitable, diverse and exciting campus community for the benefit of staff and students. It is your responsibility to contribute towards the development of an inclusive culture and practice in the areas of learning and teaching, research, and service orientation and delivery. As a member of the Macquarie University community, you must not discriminate against or harass others based on their sex, gender, race, marital status, carers' responsibilities, disability, sexual orientation, age, political conviction or religious belief. All staff and students are expected to display appropriate behaviour that is conducive to a healthy learning environment for everyone.

Professionalism

In the Faculty of Medicine, Health and Human Sciences, professionalism is a key capability embedded in all our courses.

As part of developing professionalism, students are expected to attend all small group interactive sessions including clinical, practical, laboratory, work-integrated learning (e.g., PACE placements), and team-based learning activities. Some learning activities are recorded (e.g., face-to-face lectures), however you are encouraged to avoid relying upon such material as they

do not recreate the whole learning experience and technical issues can and do occur. As an adult learner, we respect your decision to choose how you engage with your learning, but we would remind you that the learning opportunities we create for you have been done so to enable your success, and that by not engaging you may impact your ability to successfully complete this unit. We equally expect that you show respect for the academic staff who have worked hard to develop meaningful activities and prioritise your learning by communicating with them in advance if you are unable to attend a small group interactive session.

Another dimension of professionalism is having respect for your peers. It is the right of every student to learn in an environment that is free of disruption and distraction. Please arrive to all learning activities on time, and if you are unavoidably detained, please join activity as quietly as possible to minimise disruption. Phones and other electronic devices that produce noise and other distractions must be turned off prior to entering class. Where your own device (e.g., laptop) is being used for class-related activities, you are asked to close down all other applications to avoid distraction to you and others. Please treat your fellow students with the utmost respect. If you are uncomfortable participating in any specific activity, please let the relevant academic know.
