Macquarie University has taken all reasonable measures to ensure the information in this publication is accurate and up-to-date. However, the information may change or become out-dated as a result of change in University policies, procedures or rules. The University reserves the right to make changes to any information in this publication without notice. Users of this publication are advised to check the website version of this publication [or the relevant faculty or department] before acting on any information in this publication.

## **General Information**

Unit convenor and teaching staff Convenor Petra Graham <u>STAT1103@mq.edu.au</u> School of Mathematical and Physical Sciences See iLearn for consultation hours.

Convenor Alissa Beath STAT1103@mq.edu.au School of Psychological Sciences See iLearn for consultation hours

Convenor Connor Smith STAT1103@mg.edu.au

School of Mathematical and Physical Sciences See iLearn for consultation hours

Credit points 10

Prerequisites

Corequisites

Co-badged status

#### Unit description

This unit provides students with an introduction to research design and statistical analysis. In this unit, students will learn about common research methods used in psychology and related disciplines, critically analyse these methods, and be able to conduct their own analyses. Both experimental and non-experimental research methods are covered, as well as a variety of statistical tests, including t-tests, correlation, and chi square analyses.

Students will learn data management techniques and appropriate methods to summarise data, including both numeric and graphical summaries. Students will also gain hands-on experience using the statistical software Stata.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are

available at https://www.mq.edu.au/study/calendar-of-dates

## **Learning Outcomes**

On successful completion of this unit, you will be able to:

**ULO1:** Describe common research designs in psychological science and draw appropriate conclusions consistent with the research design.

**ULO2:** Describe statistical techniques in psychological science, including both signicance testing and effect sizes, and apply these tests appropriately to research designs.

**ULO3:** Conduct statistical tests appropriately, including using statistical software, and draw appropriate conclusions.

**ULO4:** Summarise data, both numerically and graphically, including using statistical software.

**ULO5:** Critically evaluate research, research designs, and statistical testing in psychological science.

**ULO6:** Effectively communicate research findings, both formally and informally.

## **General Assessment Information**

You will be using the software package **Stata** throughout the unit including for all of the assessments and practical classes. See how to download Stata for in the Delivery and Resources section, below, and in the <u>Required Resources</u> area of the Unit Information block in iLearn.

#### **Requirements to Pass this Unit:**

To pass this unit you must:

• Achieve a total mark equal to or greater than 50%

Attendance and Participation: There are weekly set tutorial and practical activities. You should complete these activities in the week that they are set. Your tutor will be available via the discussion forum and email to help with tutorial activities. You should attend one of the weekly zoom practical classes as detailed in iLearn.

Assignment Submission: Assignment submission will be online through the iLearn page.

Submit assignments online via the appropriate assignment link on the iLearn page. A personalised cover sheet is not required with online submissions. Read the submission statement carefully before accepting it as there are substantial penalties for making a false declaration.

 Assignment submission is via iLearn. You should upload this as a Word document or PDF file created from a Word document.

- It is your responsibility to make sure your assignment submission is legible.
- If there are technical obstructions to your submitting online, please email us to let us know.

You may submit as often as required prior to the due date/time. Please note that each submission will completely replace any previous submissions. It is in your interests to make frequent submissions of your partially completed work as insurance against technical or other problems near the submission deadline. You can apply for Special Consideration via <u>ask.mq.ed</u> u.au if there are reasonable grounds for non-submission.

#### Late Assessment Submission Penalty:

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends and public holidays). After the 7th day, a grade of '0' will be awarded even if the assessment is submitted. Submission time for all written assessments is set at **11:55 pm**. A 1-hour grace period is provided to students who experience a technical concern.

For any late submission of time-sensitive tasks, such as scheduled assessment quizzes/ tests /exams and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

In this unit, late submissions will be accepted as follows:

- · Report part 1- YES, Standard Late Penalty applies
- Report part 2- YES, Standard Late Penalty applies
- Online quizzes NO, timed assessments must be completed by the due date unless Special Consideration is granted.

**Word Count Penalty**: 5% of the possible mark will be deducted per 100 words over the word limit for the assessment task. An additional 99 words beyond the limit can be written without penalty.

**Final Exam Policy:** It is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, that is, the final day of the official examination period. The only excuse for not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these special circumstances, you may apply for special consideration via ask.mq.edu.au.

If you receive special consideration for the final exam, a supplementary exam will be scheduled in the interval between the regular exam period and the start of the next session. By making a special consideration application for the final exam you are declaring yourself available for a resit during this supplementary examination period and will not be eligible for a second special consideration approval based on pre-existing commitments. Please ensure you are familiar with the policy prior to submitting an application. Approved applicants will receive an individual notification one week prior to the exam with the exact date and time of their supplementary examination.

#### **Special Consideration**

The Special Consideration Policy aims to support students who have been impacted by short term circumstances or events that are serious, unavoidable and significantly disruptive, and which may affect their performance in assessment. If you experience circumstances or events that affect your ability to complete the written assessments in this unit on time, please inform the convenor and submit a Special Consideration request through ask.mq.edu.au.

## **Assessment Tasks**

Name	Weighting	Hurdle	Due
Online quizzes	20%	No	Week 3,8
Research Report part 1	15%	No	Week 6
Research Report part 2	25%	No	Week 10
Final Examination	40%	No	University examination period

## Online quizzes

Assessment Type 1: Quiz/Test Indicative Time on Task 2: 10 hours Due: **Week 3,8** Weighting: **20%** 

Multiple online quizzes spread across the session containing short answer and/or multiple choice questions testing both conceptual understanding and practical application of skills.

On successful completion you will be able to:

- Describe common research designs in psychological science and draw appropriate conclusions consistent with the research design.
- Describe statistical techniques in psychological science, including both signicance testing and effect sizes, and apply these tests appropriately to research designs.
- Conduct statistical tests appropriately, including using statistical software, and draw appropriate conclusions.
- Summarise data, both numerically and graphically, including using statistical software.
- Critically evaluate research, research designs, and statistical testing in psychological science.
- Effectively communicate research findings, both formally and informally.

## Research Report part 1

Assessment Type 1: Report Indicative Time on Task 2: 15 hours Due: **Week 6** Weighting: **15%** 

Students will submit the first part of a psychology research report in APA format.

On successful completion you will be able to:

- Describe common research designs in psychological science and draw appropriate conclusions consistent with the research design.
- Critically evaluate research, research designs, and statistical testing in psychological science.
- Effectively communicate research findings, both formally and informally.

## Research Report part 2

Assessment Type 1: Report Indicative Time on Task 2: 20 hours Due: **Week 10** Weighting: **25%** 

Students will submit the remainder of the psychology research report in APA format that they began in Part 1.

On successful completion you will be able to:

- Describe common research designs in psychological science and draw appropriate conclusions consistent with the research design.
- Describe statistical techniques in psychological science, including both signicance testing and effect sizes, and apply these tests appropriately to research designs.
- Conduct statistical tests appropriately, including using statistical software, and draw appropriate conclusions.
- Summarise data, both numerically and graphically, including using statistical software.
- Critically evaluate research, research designs, and statistical testing in psychological science.

• Effectively communicate research findings, both formally and informally.

## **Final Examination**

Assessment Type <sup>1</sup>: Examination Indicative Time on Task <sup>2</sup>: 5 hours Due: **University examination period** Weighting: **40%** 

Formal examination testing the learning outcomes of the unit.

On successful completion you will be able to:

- Describe common research designs in psychological science and draw appropriate conclusions consistent with the research design.
- Describe statistical techniques in psychological science, including both signicance testing and effect sizes, and apply these tests appropriately to research designs.
- Conduct statistical tests appropriately, including using statistical software, and draw appropriate conclusions.
- Summarise data, both numerically and graphically, including using statistical software.
- Critically evaluate research, research designs, and statistical testing in psychological science.
- Effectively communicate research findings, both formally and informally.

<sup>1</sup> If you need help with your assignment, please contact:

- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.

<sup>2</sup> Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

## **Delivery and Resources**

#### Classes:

Lectures (beginning in Week 1): There is one 2-hour lecture, delivered as an online recording, each week and one 1-hour Q&A lecture where students can ask questions about lecture content. Lectures must be watched prior to attempting tutorial and practical activities that same week..

Tutorial activities (beginning in Week 1): Tutorial activities can be found in the relevant weekly

area of iLearn. More information is available under Tutorial Information for STAX1103 on iLearn.

Practical classes (beginning in Week 1): Practical activities can be found in the relevant weekly area of iLearn. Students can attend any one-hour practical class per week (see the classes and more information under <u>Practical Information for STAX1103</u> on iLearn) to obtain assistance with the practical material.

#### Resources:

Please see the <u>Required Resources</u> section of iLearn for details of recommended and required texts and other resources. Textbooks can change from one year to another so do not purchase without checking iLearn.

**Technology Used and Required:** All unit material is delivered through iLearn. The link may be found at <a href="http://ilearn.mq.edu.au">http://ilearn.mq.edu.au</a>. This unit requires use of a laptop or desktop computer so that the statistical package Stata can be installed and used; Stata can be downloaded for free from the university through the following link: <a href="https://students.mq.edu.au/support/technology/soft">https://students.mq.edu.au/support/technology/soft</a> ware/stata. Students can also install the Microsoft Office Suite (containing Excel and Word etc) for free, this may be useful for report writing and data set handling (<a href="https://students.mq.edu.au/support/technology/software/microsoft">https://students.mq.edu.au/support/technology/software/microsoft</a>).

## Unit Schedule

See iLearn for details of assessment delivery and timings. Note that this schedule is subject to change if necessary.

Week	Торіс	Assessments
1	Introduction	
2	Research design and analysis; Stata demonstration	
3	Hypothesis testing	Quiz 1
4	Ethics + Measurement	
5	One-sample tests	
6	Non-experimental designs	Report part 1
7	Experimental designs	
	Mid-session break	
8	Categorical data analysis	Quiz 2
9	Longitudinal designs	
10	Mixed methods	Report part 2
11	Best practice in Psychological Science	
12	Putting it all together	

Week	Торіс	Assessments
13	Conclusions	
	Final examination period	

## **Policies and Procedures**

Macquarie University policies and procedures are accessible from Policy Central (https://policie s.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

- Academic Appeals Policy
- Academic Integrity Policy
- Academic Progression Policy
- Assessment Policy
- Fitness to Practice Procedure
- Assessment Procedure
- · Complaints Resolution Procedure for Students and Members of the Public
- Special Consideration Policy

Students seeking more policy resources can visit <u>Student Policies</u> (<u>https://students.mq.edu.au/su</u> <u>pport/study/policies</u>). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit <u>Policy Central</u> (<u>https://policies.mq.e</u> <u>du.au</u>) and use the <u>search tool</u>.

#### **Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

#### Results

Results published on platform other than <u>eStudent</u>, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in <u>eStudent</u>. For more information visit <u>ask.mq.edu.au</u> or if you are a Global MBA student contact globalmba.support@mq.edu.au

## Academic Integrity

At Macquarie, we believe <u>academic integrity</u> – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a

range of resources and services to help you reach your potential, including free <u>online writing an</u> d maths support, academic skills development and wellbeing consultations.

## Student Support

Macquarie University provides a range of support services for students. For details, visit <u>http://stu</u> dents.mq.edu.au/support/

#### **The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- · Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- Subject and Research Guides
- Ask a Librarian

#### **OUA support and policies**

For information and administrative processes specific to OUA studies, please see this website: ht tps://students.mq.edu.au/study/faculties/open-universities-australia

## Student Services and Support

Macquarie University offers a range of <u>Student Support Services</u> including:

- IT Support
- · Accessibility and disability support with study
- Mental health support
- <u>Safety support</u> to respond to bullying, harassment, sexual harassment and sexual assault
- Social support including information about finances, tenancy and legal issues
- <u>Student Advocacy</u> provides independent advice on MQ policies, procedures, and processes

## **Student Enquiries**

Got a question? Ask us via AskMQ, or contact Service Connect.

## IT Help

For help with University computer systems and technology, visit <u>http://www.mq.edu.au/about\_us/</u>offices\_and\_units/information\_technology/help/.

When using the University's IT, you must adhere to the <u>Acceptable Use of IT Resources Policy</u>. The policy applies to all who connect to the MQ network including students.

## **Changes from Previous Offering**

Every semester feedback results in adjustment to content and/or delivery in this unit. As such we encourage students to provide constructive feedback via student surveys, to teaching staff directly or via the FSE Student Experience and Feedback link in the iLearn page.

## **OUA Student Information**

For information for current OUA students at Macquarie University, see this website: <u>https://students.mq.edu.au/study/faculties/open-universities-australia</u>
