Unit description
This unit explores business forecasting by considering the planning process of the organisation, the environment in which business forecasts are made, prediction of key variables using qualitative and quantitative information, and the practical considerations of forecast implementation. Quantitative predictions will generally make use of spreadsheets and simple statistical procedures that can be easily applied in the business environment.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:

UL01: Identify and explain the need for, and uses of, forecasting in a business context.
UL02: Select and apply quantitative and qualitative forecasting techniques for use in business.
UL03: Demonstrate practical knowledge of spreadsheets and statistical software to produce business forecasts.
UL04: Critically examine business contexts and transform relevant data to provide
recommendations for stakeholders.

General Assessment Information

Late Assessment Submission Penalty (written assessments)

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

There will be two online quizzes that involve a range of multiple choice and/or short answer style questions. You will be making calculations and recommendations.

On successful completion you will be able to:

- Identify and explain the need for, and uses of, forecasting in a business context.
- Select and apply quantitative and qualitative forecasting techniques for use in business.
- Demonstrate practical knowledge of spreadsheets and statistical software to produce business forecasts.
Critical Thinking - Applying forecasting to problems - Two Reports

Assessment Type: Case study/analysis
Indicative Time on Task: 30 hours
Due: week 8 and week 12
Weighting: 40%

Students will submit two reports, of between 500-750 words each, as well as numerical answers submitted through iLearn, addressing the presented problem/s and/or issues. Your ability to think critically will be assessed.

On successful completion you will be able to:
- Select and apply quantitative and qualitative forecasting techniques for use in business.
- Critically examine business contexts and transform relevant data to provide recommendations for stakeholders.

Final Exam

Assessment Type: Examination
Indicative Time on Task: 20 hours
Due: TBC
Weighting: 50%

An exam of 2 hours duration (plus 10 minutes reading time) will be undertaken during the University Examination period.

On successful completion you will be able to:
- Select and apply quantitative and qualitative forecasting techniques for use in business.
- Critically examine business contexts and transform relevant data to provide recommendations for stakeholders.

1 If you need help with your assignment, please contact:
- the academic teaching staff in your unit for guidance in understanding or completing this type of assessment
- the Writing Centre for academic skills support.
Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation.

**Delivery and Resources**

**Classes:**

3 hours of teaching per week consisting of:

* 1 x 2 hour lecture and
* 1 x 1 hour tutorial.

**NOTE:** Tutorials begin in Week 2.

Classes are face-to-face (no online classes).

**Recommended Texts and/or Materials**

You do not need to buy these books. Handouts of readings that cover similar material will be distributed via iLearn.

Also available as a Kindle book.

*The library has complimentary electronic copies where a certain number of users can access the book at the same time.*

**Additional readings**

**Technology Used and Required**

Students will learn to use *Microsoft Excel* (compulsory) and *MINITAB* (optional).

**Unit Web Page**

The web page for this unit can be found at: [iLearn](http://ilearn.mq.edu.au)

**Teaching and Learning Strategy**

This unit is lecture- and tutorial-based, as well as pre-recorded concept videos. Typically, the class-time structure will be like this:

1. **Lectures:** Business Forecasting theory and concepts will be discussed. We will establish links between theory and your personal knowledge in a business strategic planning setting during class discussions.

2. **Tutorials:** Students are required to work on some tasks of business forecasting solutions using several models and techniques. Student participation and meaningful contribution are essential to understand business forecasting concepts and calculations.

Lecture notes will be posted before each lecture on [iLearn](http://ilearn.mq.edu.au)
