Unit description

Responding to the challenges of the twenty-first century requires learners to be engaged, innovative and enterprising with the confidence and skills to use critical and creative thinking. As educators we need to know how to nurture thinking that is productive, purposeful and intentional and be able to design learning experiences that encourage learners to become more confident and autonomous problem-solvers and thinkers. This unit will address the critical knowledge of enrichment thinking including theories of cognition and cognitive development and explore research-informed strategies for the explicit teaching and embedding of critical and creative thinking in a range of learning areas and educational contexts.

## Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>

## Learning Outcomes

On successful completion of this unit, you will be able to:

**ULO1:** Demonstrate critical, in-depth and extensive understanding and application of the knowledge base underpinning the principles and practices of enrichment thinking and creativity in curriculum.

**ULO2:** Develop logical, sequential, challenging and research informed lessons and

resource materials to meet student learning outcomes.

**ULO4:** Implement a range of pedagogical models to enact critical and creative thinking in educational contexts.

**ULO5:** Critically evaluate pedagogical research and practice in order to differentiate teaching to meet learning needs.

**ULO3:** Analyse ways in which research evidence contributes to facilitating learners' development.

**ULO6:** Apply knowledge of educational research and theory to design and critically evaluate assessment strategies that demonstrate the achievement of learning outcomes.

**ULO7:** Demonstrate effective communication strategies to report on rigorous investigation or scholarly inquiry into issues of critical relevance to enrichment thinking and creativity in educational contexts.

- Resilient: Assessment Task feedback aims to focus on the development of academic skills including critical thinking and using feedback to improve performance.
- Reflexive: Workshop activities provide opportunities for students to reflect on their own strengths and skills and to show how they can adapt to meet the learning needs of their students. Assessment Task 2 requires a pedagogical reflection.
- Research Engaged: Assessment Task 1 requires a literature review. The literature review provides the scholarly base for completing Assessment Task 2.
