<td>We live an increasing part of our lives online, playing videogames, and engaging with various technologies and virtual realities. Our workplaces are more automated, cars drive themselves, and robots take care of us. Is this a good thing? What is it doing to us? Where will it take us in the future? In this unit we draw on philosophical and ethical theories to explore the impacts of information and related technologies on humanity. Topics we will explore include issues around human-technology relations, such as: technological neutrality and technological determinism; embodiment, gender, and technology; and the co-evolution of mind and technology. We will examine ethical aspects of technology, such as: the impacts that online sharing has on our philosophical understandings of friendship; the right to internet privacy; how theories in moral psychology explain the ethical impacts of playing videogames; the ethics of self-driving cars and robotic care-workers; and the justice implications of the automatisation of work. Finally, we also look at topics surrounding the intertwining of humanity and technology and the future impacts of Artificial Intelligence (AI), such as: whether AI and the singularity is an existential risk to humanity; how technology will be used as a tool of human enhancement; and whether we will (and should) become cyborgs and stop being human.</td>

Learning Outcomes
On successful completion of this unit, you will be able to:

ULO1: explain the major theories about the philosophical and ethical issues raised by new forms of technology
ULO2: analyse arguments in the relevant literatures
ULO3: evaluate relevant theories and arguments critically
ULO4: communicate clearly your own perspective on the views and arguments presented in the unit

General Assessment Information
Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a mark of ‘0’ (zero) will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical issue. This late penalty will apply to written reports and recordings only. Late submission of time sensitive tasks (such as tests/exams, performance assessments/presentations, scheduled practical assessments/labs will be addressed by the unit convenor in a Special consideration application.
