Unit description

This unit builds on first year accounting units, exploring financial reporting environment in greater depth and challenging students to question the foundations of financial reporting. Areas and topics within International Financial Reporting Standards (IFRS) and its Australian equivalents Australian Accounting Standards Board (AASB) are reviewed. On the completion of this unit, students will be familiar with the regulatory environment for financial reporting, be able to apply relevant accounting standards to key business processes, prepare a complete set of financial statements based on both accrual and cash accounting, describe the alternative reporting frameworks such as the Global Reporting Initiative (GRI) and be able to show the accounting entries for company financing. The unit develops technical and professional judgment skills and effective business communication skills through the Business Research Report which requires students to research, review and recommend relevant accounting treatments.
