Unit description

Business performance is concerned with equipping students with skills for critiquing the performance of a business and supporting business decision making. The ability to critique the performance of a business and provide advice in the execution of business strategy is an essential skill for Accountants. In this unit, students apply appropriate financial models in conjunction with non-financial factors in order to evaluate alternatives and determine appropriate business solutions. Students analyse financial and non-financial factors and develop a model that incorporates sensitivity analysis to support business investment decisions. Students then evaluate funding options to support these investment decisions. By engaging in activities and assessments, students develop and demonstrate skills for communicating their insights and recommendations to a variety of audiences.

Important Academic Dates

Information about important academic dates including deadlines for withdrawing from units are available at <https://www.mq.edu.au/study/calendar-of-dates>
