Unit description
This unit covers the analysis of cash flows dependent on uncertain events due to mortality, health, retirement and other factors. It introduces the concept of the expected present value of payments under various life insurance contracts, including whole life, term and endowment assurances; immediate and temporary annuities; and deferred assurances and annuities. Furthermore, important concepts of pricing and reserving for future contingent liabilities are discussed. Equations of value are established to calculate net premiums. Prospective and retrospective net premium reserves required to meet future liabilities are determined and compared. Techniques of survival analysis are used to estimate survival distributions and evaluate risk factors in actuarial applications. Students performing satisfactorily well in ACST8042 and ACST8043 will meet the requirements to earn credit from Exam FAM of the Society of Actuaries.

Important Academic Dates
Information about important academic dates including deadlines for withdrawing from units are available at https://www.mq.edu.au/study/calendar-of-dates

Learning Outcomes
On successful completion of this unit, you will be able to:
ULO1: Demonstrate an understanding of the properties and uses of various commonly used frequency, severity and aggregate models.

ULO2: Perform the parameter estimation for frequency, severity and aggregate models.

ULO3: Explain and identify different features of insurance and reinsurance coverages.

ULO4: Explain the key concepts of classical credibility and perform related calculations.

ULO5: Apply basic methods to perform the pricing and reserving for short term insurance coverages.

ULO6: Understand fundamentals of option pricing.

**General Assessment Information**

**Late Assessment Submission Penalty (written assessments)**

Unless a Special Consideration request has been submitted and approved, a 5% penalty (of the total possible mark) will be applied each day a written assessment is not submitted, up until the 7th day (including weekends). After the 7th day, a grade of ‘0’ will be awarded even if the assessment is submitted. Submission time for all written assessments is set at 11.55pm. A 1-hour grace period is provided to students who experience a technical concern.

For any late submissions of time-sensitive tasks, such as scheduled tests/exams, performance assessments/presentations, and/or scheduled practical assessments/labs, students need to submit an application for Special Consideration.

**Assessment Tasks**

**Assignment**

Assessment Type 1: Qualitative analysis task

Indicative Time on Task 2: 20 hours

Due: Week 7 (Assignment 1) and Week 12 (Assignment 2)

Weighting: 20%

Problem-solving questions requiring detailed solutions using R.
On successful completion you will be able to:

- Demonstrate an understanding of the properties and uses of various commonly used frequency, severity and aggregate models.
- Perform the parameter estimation for frequency, severity and aggregate models.
- Explain and identify different features of insurance and reinsurance coverages.
- Explain the key concepts of classical credibility and perform related calculations.

**Class test**

Assessment Type: Quiz/Test

Indicative Time on Task: 10 hours

Due: Week 9

Weighting: 20%

The test will be approximately 90 minutes to be held during class time.

On successful completion you will be able to:

- Demonstrate an understanding of the properties and uses of various commonly used frequency, severity and aggregate models.
- Perform the parameter estimation for frequency, severity and aggregate models.

**Final exam**

Assessment Type: Examination

Indicative Time on Task: 28 hours

Due: University Exam Period

Weighting: 60%

The final examination will be closed book, a three-hour paper with ten minutes reading time, to be held during the University Examination period.

On successful completion you will be able to:

- Demonstrate an understanding of the properties and uses of various commonly used frequency, severity and aggregate models.
- Perform the parameter estimation for frequency, severity and aggregate models.
- Explain and identify different features of insurance and reinsurance coverages.
Explain the key concepts of classical credibility and perform related calculations.

• Apply basic methods to perform the pricing and reserving for short term insurance coverages.

• Understand fundamentals of option pricing.

1 If you need help with your assignment, please contact:

• the academic teaching staff in your unit for guidance in understanding or completing this type of assessment

• the Writing Centre for academic skills support.

2 Indicative time-on-task is an estimate of the time required for completion of the assessment task and is subject to individual variation

Delivery and Resources

The unit will be delivered by weekly seminars. The unit material will be available for download from iLearn. Students will be required to use iLearn, R, PDF, Excel, Word, a non-programmable calculator and other resources to be mentioned on iLearn. Some recommended readings are:

Some other references or recommended reading materials will be introduced on the iLearn page whenever appropriate.

Policies and Procedures

Macquarie University policies and procedures are accessible from Policy Central (https://policies.mq.edu.au). Students should be aware of the following policies in particular with regard to Learning and Teaching:

• Academic Appeals Policy

• Academic Integrity Policy

• Academic Progression Policy

• Assessment Policy
Students seeking more policy resources can visit Student Policies (https://students.mq.edu.au/support/study/policies). It is your one-stop-shop for the key policies you need to know about throughout your undergraduate student journey.

To find other policies relating to Teaching and Learning, visit Policy Central (https://policies.mq.edu.au) and use the search tool.

**Student Code of Conduct**

Macquarie University students have a responsibility to be familiar with the Student Code of Conduct: https://students.mq.edu.au/admin/other-resources/student-conduct

**Results**

Results published on platform other than eStudent, (eg. iLearn, Coursera etc.) or released directly by your Unit Convenor, are not confirmed as they are subject to final approval by the University. Once approved, final results will be sent to your student email address and will be made available in eStudent. For more information visit ask.mq.edu.au or if you are a Global MBA student contact globalmba.support@mq.edu.au

**Academic Integrity**

At Macquarie, we believe academic integrity – honesty, respect, trust, responsibility, fairness and courage – is at the core of learning, teaching and research. We recognise that meeting the expectations required to complete your assessments can be challenging. So, we offer you a range of resources and services to help you reach your potential, including free online writing and maths support, academic skills development and wellbeing consultations.

**Student Support**

Macquarie University provides a range of support services for students. For details, visit http://students.mq.edu.au/support/

**The Writing Centre**

The Writing Centre provides resources to develop your English language proficiency, academic writing, and communication skills.

- Workshops
- Chat with a WriteWISE peer writing leader
- Access StudyWISE
- Upload an assignment to Studiosity
- Complete the Academic Integrity Module

The Library provides online and face to face support to help you find and use relevant information resources.

- **Subject and Research Guides**
- **Ask a Librarian**

### Student Services and Support

Macquarie University offers a range of **Student Support Services** including:

- **IT Support**
- **Accessibility and disability support** with study
- **Mental health support**
- **Safety support** to respond to bullying, harassment, sexual harassment and sexual assault
- **Social support including information about finances, tenancy and legal issues**
- **Student Advocacy** provides independent advice on MQ policies, procedures, and processes

### Student Enquiries

Got a question? Ask us via **AskMQ**, or contact **Service Connect**.

### IT Help

For help with University computer systems and technology, visit [http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/](http://www.mq.edu.au/about_us/offices_and_units/information_technology/help/).

When using the University’s IT, you must adhere to the **Acceptable Use of IT Resources Policy**. The policy applies to all who connect to the MQ network including students.

Unit information based on version 2024.02 of the **Handbook**
