**Unit description**  
This introductory unit in corporate finance focuses on the financing and investing decisions made by the finance manager of an organisation. While the emphasis is on the theory of the firm, students are also given exposure to current issues affecting corporate finance. Satisfactory completion of the unit equips students with a grasp of the following principals of financial economics: the relation between risk and expected return and the time value of money. The unit also provides an introductory coverage of derivative securities and no arbitrage valuation in the international finance.
